Consumer Price Index (CPI). Base 2011
January 2014

Overall index

	Monthly change	Change over last January	Annual change
January	-1.3	-1.3	0.2

Main results

- The **annual change** of the CPI for the month of January stands at **0.2%**, one tenth below that registered in the previous month.
- The **annual change** of **core** inflation remains at **0.2%**.
- The **monthly change** of the overall index is **-1.3%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **0.3%**, thus it remains the same, as compared with December.

Annual evolution of consumer prices

The annual rate for the overall Consumer Price Index (CPI) in January was **0.2%**, one tenth lower than that registered in the previous month. This is the lowest rate registered in the CPI for the month of January since the series started in 1961.

The groups that most contributed to this variation were:

- **Transport**, with an annual variation of **-0.4%**, almost one tenth and a half lower than that registered the previous month. This behaviour is mainly due to the decrease in the prices of *fuels and lubricants* this month, as compared with the increase registered in January 2013.
- **Spirits and tobacco**, whose variation decreased almost three tenths, reaching **2.9%**, due to the price stability in the prices of *tobacco*, which registered an increase in the last year.

Despite the decrease registered in the annual rate for the overall CPI, worth noting is the increase for the group:

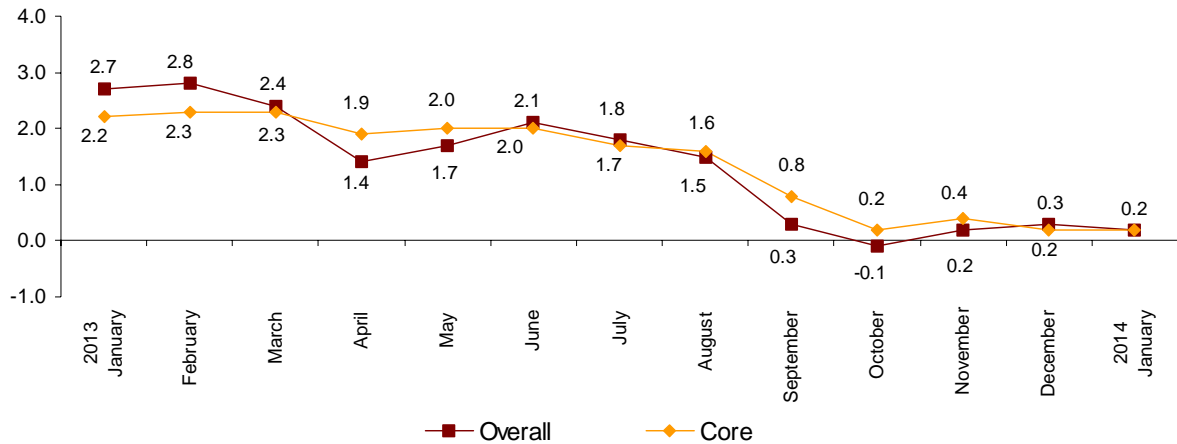

• **Housing**, whose monthly rate increased more than a tenth, up to **1.1%**, due to the increase in the prices of *electricity*, as compared with the decrease registered in January 2013.

Contribution of the groups to the annual change of the CPI

The annual change for **core inflation** (overall index excluding unprocessed food and energy products) remains at **0.2%**, the same as the overall CPI. These changes did not coincide since June 2007.

Annual evolution of the CPI Overall and core index

Monthly evolution of consumer prices

In January, the monthly change of the overall CPI was **-1.3%**.

The groups with the greatest negative contribution to the overall index are the following:

- **Clothing and footwear**, with a monthly rate of **-14.9%**, covering the effect of the first decrease in prices in the winter reductions. Its contribution to the overall CPI was **-1.132**.
- **Leisure and culture**, whose monthly variation of **-2.1%**, with a contribution of **-0.154**, was mainly explained by the decrease in the prices of *package holidays*.
- **Transport**, with a monthly change of **-0.5%** and a contribution of **-0.071**, mainly due to the decrease in the prices of *fuels and lubricants*, and, to a lesser extent, of *cars*.
- **Communication**, whose monthly rate of **-1.5%** contributes **-0.056**, due to the decrease in the prices of *phone services*.
- **Home furnishings**, which registered a monthly rate of **-0.8%** and a contribution of **-0.053**. Worth noting in this behaviour was the decrease in the prices of *furniture* and *household textiles*.

In turn, among the groups with the greatest positive contribution to the overall index, worth noting are:

- **Food and non-alcoholic beverages**, with a monthly variation of **0.4%**, and a contribution of **0.071**. Worth noting in this behaviour was the increase in the prices of *fresh fish*, *fresh fruits* and *crustaceans and molluscs*. In turn, it is worth noting the drop in the prices of *fresh vegetables*.
- **Housing**, whose monthly variation of **0.5%**, with a contribution of **0.059**, was mainly explained by the increase in the prices of *electricity* and, to a lesser extent, of *water supply*.

Monthly evolution of the CPI Overall index

A more detailed analysis showed the divisions that had the greatest contribution to the monthly CPI change during the month of January.

Index of Consumer Prices at Constant Taxes

In January, the annual rate of CPI-CT was **0.2%**, the same that registered by the overall CPI.

The monthly change of the CPI-CT was **-1.3%**.

In turn, the annual rate of HICP-CT registered an annual change of **0.3%**, remaining the same as that of the HICP.

The monthly change of the HICP-CT was **-1.8%**.

Informative annex

Updated weightings, CPI 2011 base

The National Statistics Institute has carried out the annual update of the weightings used to compute the Consumer Price Index (CPI), in accordance with the CPI System, 2011 base.

The CPI, 2011 base, is distinguished by its dynamism and ability to adapt to changes in consumer behaviour, via the analysis of the evolution of expenditure. With this objective, an in-depth study is carried out of the changes noted in the market.

As a result of this study, the CPI weighting structure was updated in 2014. The information used for the update is taken from the Household Budget Survey (HBS) and from other sources. In this way, the CPI reflects the changes in habits of consumers occurring in the last year.

The changes entered do not affect continuity of the CPI series, 2011 base, since the computation formula of the 2011 System consists of chain-linking the indices, so that no break occurs. Therefore, the weighting update does not affect the published changes.

The following table shows the weightings used during 2013 and those, which will be used during 2014 to compute the overall CPI and that of the following groups:

Updated CPI weightings

Likewise, weightings used to compute the CPI have also been updated, to adapt it to the changes in consumer behaviour.

Information on new weightings, as well as those used in previous years, from the year 2001, is available on the INE website (www.ine.es).
