Main results

- The **annual change** of the CPI for the month of May stands at **-0.2%**, four tenths over that registered in the previous month.
- The **annual change of core** inflation increases two tenths, reaching **0.5%**.
- The **monthly change** of the overall index is 0.5%.

Annual evolution of consumer prices

The annual rate for the overall Consumer Price Index (CPI) in May was **-0.2%**, four tenths over than that registered in the previous month.

The groups that most contributed to this variation were:

- **Transport**, with an annual variation of **-2.2%**, more than one point higher than that registered the previous month and mainly due to the increase in the prices of *fuels and lubricants*, as compared to the stability of the previous year.
- **Food and non-alcoholic beverages**, with a **1.3%** rate, almost one tenth more than in April. Worth noting in this evolution was the increase in the prices of *fresh fruit*, which was higher than in the previous year. It was also influenced, though in a lesser extent, by the decrease in the prices of *fresh vegetables*, which was lower than in the previous year, and the increases in the prices of *potatoes and their by-products* and *oils*, as compared to the drops registered in May 2014.
- **Communications**, whose annual rate increased more than one point and a half up to **-1.9%**, due to the increase in the prices of *phone services* this month.

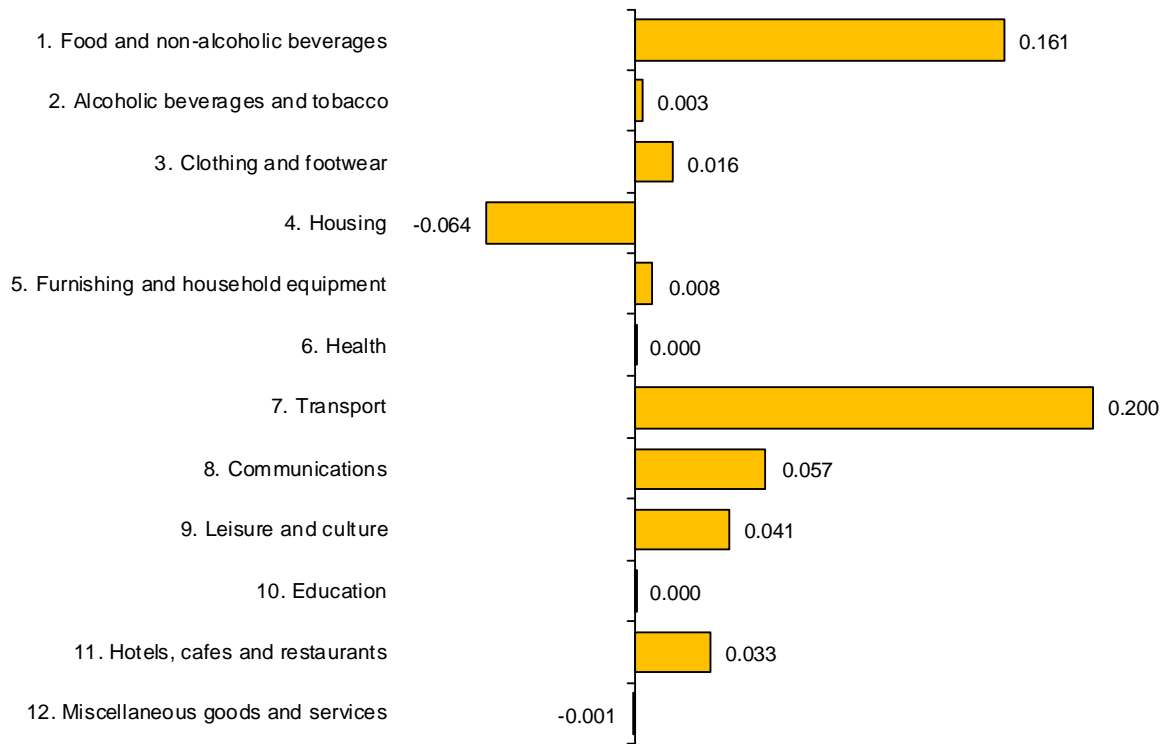

• **Leisure and culture**, with an annual variation of **-0.8%**, five tenths higher than that registered the previous month and mainly due to the increase in the prices of *package holidays*, lower than the previous year.

• **Hotels, cafes and restaurants**, whose annual rate stood at **0.9%**, three tenths over that of April, due to the increase in the prices of *Hotels and other accommodation* this month, while last year they decreased.

In spite of the increase registered in the annual rate for the overall CPI, worth noting is the decrease for the group:

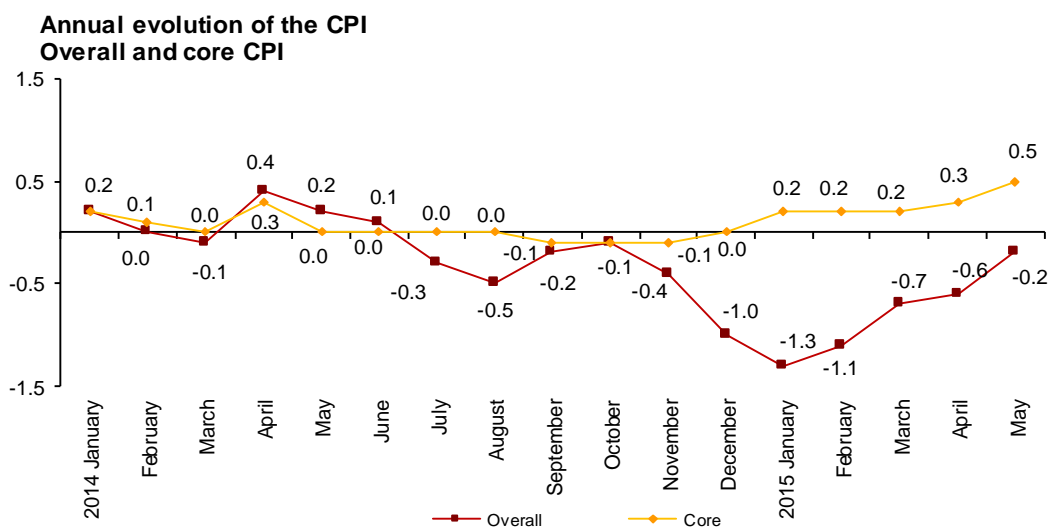

• **Housing**, whose annual rate decreased five tenths, down to **-2.4%**, due to the decrease in the prices of *electricity*, and, to a lesser extent, *gas*, as compared to the stability of the previous year.

Contribution of the groups to the annual change of the CPI
