**Consumer Price Index (CPI). Base 2011**  
December 2012

**Overall index**

	Monthly change	Change over last December	Annual change
December	0.1	2.9	2.9

**Main results**

- The **annual change** of the CPI for the month of December stands at **2.9%**, the same registered the previous month.
- The **annual change** of **core** inflation decreases two tenths and stands at **2.1%**.
- **Monthly change** of the overall index is **0.1%**.
- The **Harmonised Index of Consumer Prices (HICP) annual change** stands at **3.0%**, thus it remains as compared with November.

**Annual evolution of consumer prices**

The annual change for the overall Consumer Price Index (CPI) in December was **2.9%** the same than that registered in November. This change was the same than the CPI flash estimate, published last 2 January.

The group that most contributed positively in this rate was:

- **Food and non-alcoholic beverages**, with a variation of **3.0%**, one tenth higher than the previous month. The areas highlighted by their influence in this increase were *fresh vegetables* and *edible oils*. Despite the increase of the annual variation of this group, highlighted the decrease in prices of *fresh fruit*, that was higher than last year.

In turn, the groups with negative contribution were:

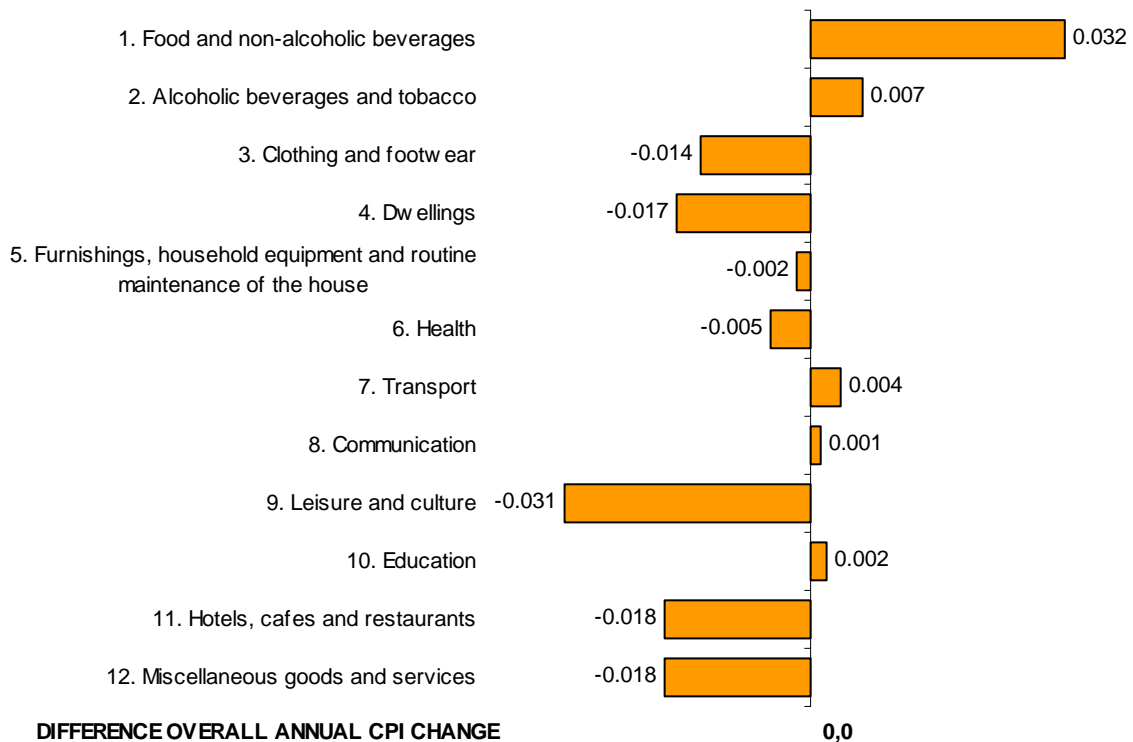

- **Recreation and culture**, that presented an annual change of **0.8%**, four tenths lower than November, mainly due to the increase in prices of *package holidays* increased more in December 2011 than this month.

- **Restaurants, cafés and hotels**, that decreased its rate one tenth standing at **0.8%**, mainly due to the stability of the prices of *accommodation services*, as compared with the increase registered the previous year.

- **Miscellaneous goods and services**, with an annual change of **3.3%**, two tenths lower than the previous month. This behaviour was explained by the decrease in prices of *services for personal care*.

- **Housing**, whose change decreased two tenths, up to **5.6%**. This drop was due to the decrease in prices of *heating fuels*, that increased in December 2011.

**Influence of the groups on the annual CPI change**

The annual change for **core inflation** (overall index excluding unprocessed food and energy products) decreased two tenths, up to **2.1%**. The difference from the overall index change increased standing at eight tenths.

**Annual evolution of the CPI  
Overall and core index**

**Monthly evolution of consumer prices**

In December, the monthly change of the overall CPI was **0.1%**.

The groups with the greatest positive monthly contribution to the overall index were the following:

- **Recreation and culture**, with a change of **1.8%**, that contributed **0.133**, due to the rise in prices of *package holidays*.
- **Food and non-alcoholic beverages**, that presented a monthly rate of **0.5%** and a contribution of **0.089**. Worth noting in this behaviour the increase in prices of *fresh vegetables, fresh fish and edible oils*.

In turn, among the groups with negative contribution, worth noting :

- **Clothing and footwear**, with a rate of **-1.6%**, covering the effect of the first decrease in prices in the winter reductions. Its contribution to the overall CPI was **-0.132**.
- **Transport**, whose monthly change of **-0.2%** was due to the decrease of *fuels and lubricants*. The contribution on the CPI was **-0.025**.

A more detailed analysis showed the divisions that had the greatest contribution to the monthly CPI change during the month of December.

### Divisions with the greatest positive contribution to the monthly change of the CPI

	Monthly change (%)	Contribution
<b>Food products</b>		
Fresh vegetables	6.5	0.060
Fresh fish	2.3	0.020
Edible oils	3.2	0.017
