

24 July 2015

Industrial Price Index (IPRI). Base 2010
June 2015. *Provisional data*

**The annual rate of the Industrial Price Index stands at –1.4%,
the same figure recorded in May.**

The monthly variation rate of industrial prices is 0.9%

Annual evolution of industrial prices

The annual rate of the General Industrial Price Index (IPRI) stood at –1.4% in June, the same figure recorded in May.

By economic destination of the goods, the industrial sectors that increased their variation the most were:

- **Energy**, whose annual rate increased one tenth up to –7.4%. This behaviour was due the increase in the prices of *Electric power generation, transmission and distribution* this month, greater than the increase registered in June 2014.

Although the annual rate of *Energy* increased, it is worth noting the decrease in the rate of *Manufacture of gas; distribution of gaseous fuels through mains* and *Manufacture of refined petroleum products*, due to the decrease in prices of this industrial sector this month, as compared with the increase of the previous year. In fact, *Manufacture of gas; distribution of gaseous fuels through mains* registered its lowest rate since March 2010.

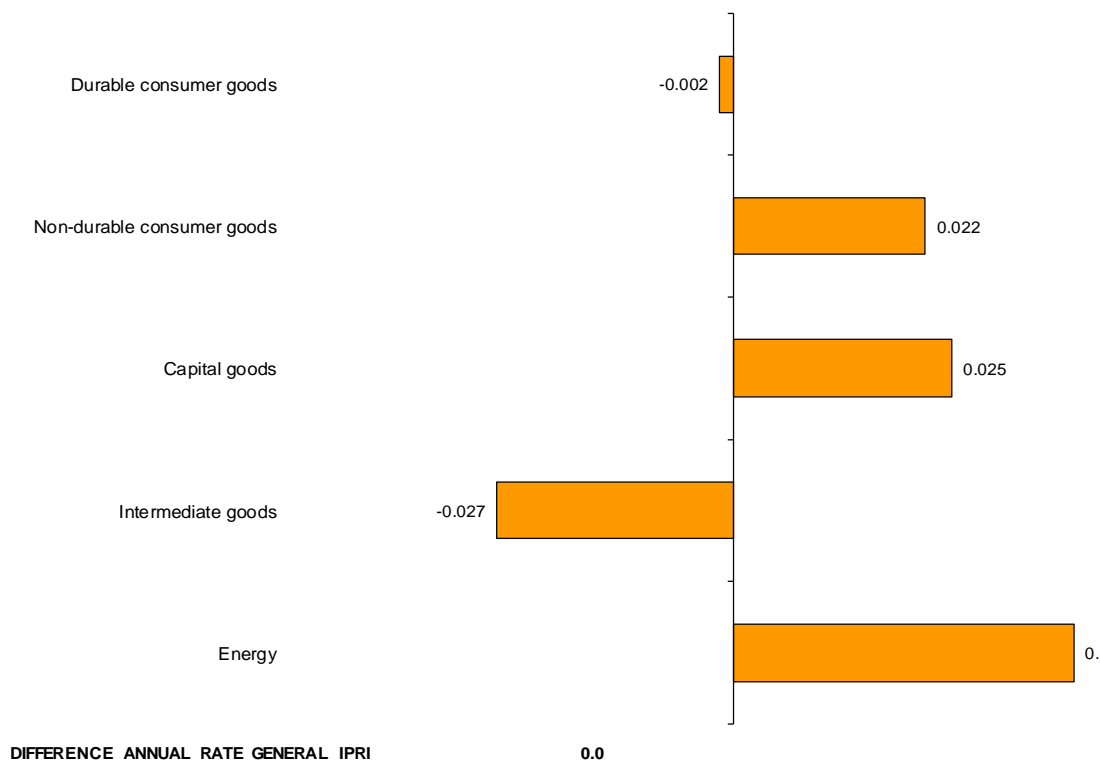

- **Capital goods**, whose annual variation increased two tenths, standing at 1.0%. This was mainly due to the increase in the prices of *Manufacture of locomotives and rolling stock*, as compared with the decrease registered in the same month of the previous year.

- **Non-durable consumer goods**, whose annual variation increased a tenth, standing at 1.3%, mainly due to the increase in the prices of *Manufacture of vegetable and animal oils and fats*.

In turn, among the sectors whose annual rate decreased, worth noting was:

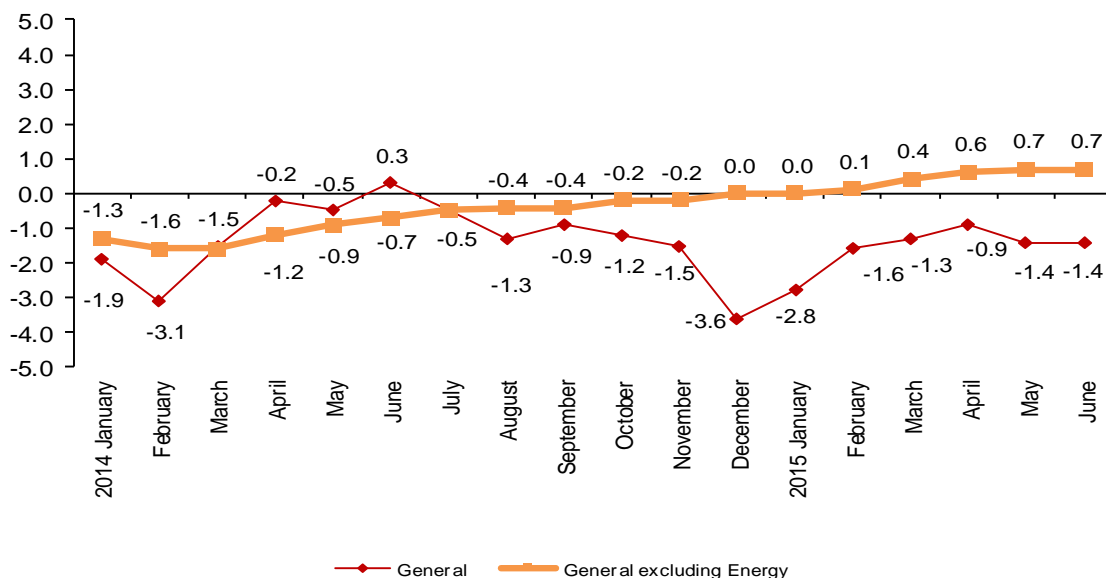

- **Intermediate goods**, whose variation decreased one tenth, standing at 0.1%, due to the decrease in the prices of *Manufacture of basic precious and other non-ferrous metals*, as compared with increase registered in June 2014.

Contribution of the industrial sectors in the annual rate of the IPRI

The annual variation rate of the **general index excluding Energy** remains stable as compared to the previous month, standing at **0.7%**, thus standing two points over that of the general IPRI.

Annual evolution of the IPRI General index and general index excluding Energy

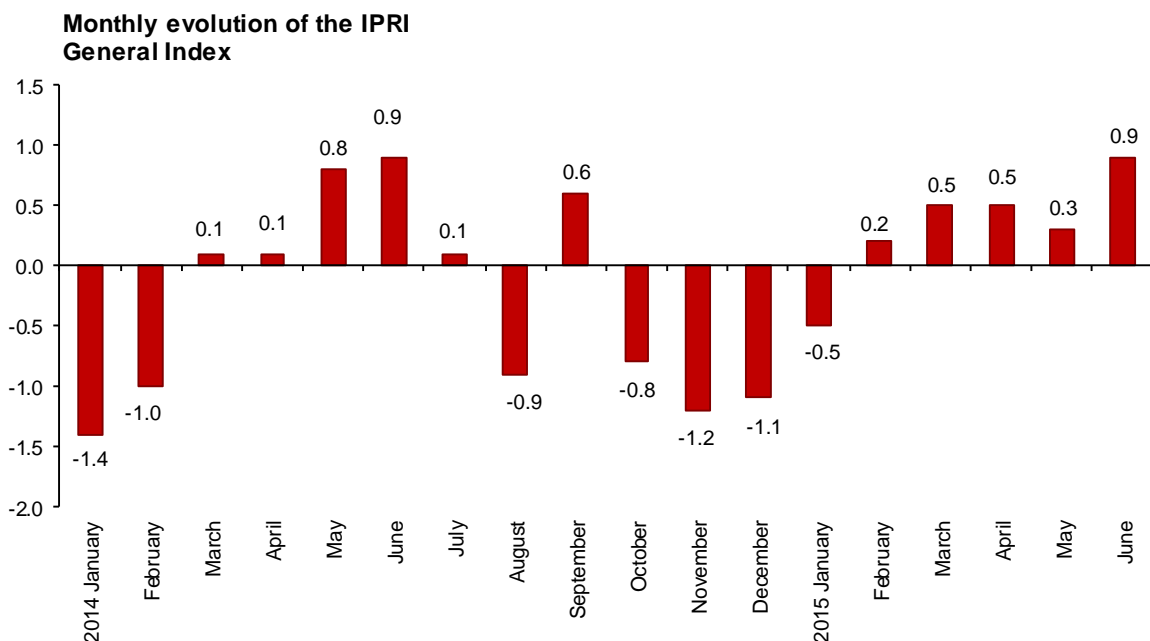

Monthly evolution of industrial prices

In June, the monthly variation of the general IPRI was **0.9%**.

By economic destination of the goods, all sectors had a monthly positive contribution to general index. Among them, worth noting were:

- **Energy**, with a variation of **3.2%** and a contribution to the general index of **0.852**. This was due to the increase in the prices of *Electric power generation, transmission and distribution*.
- **Intermediate goods**, with a rate of **0.1%** and an effect of **0.023**. This was mainly due to the increase in prices of *Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms*. This increase is offset, in part, by the decrease in the prices of *Manufacture of basic precious and other non-ferrous metals*.
- **Non-durable consumer goods**, whose rate of **0.1%** had a contribution of **0.019**. This was due to the increase in prices of *Manufacture of vegetable and animal oils and fats*.

A more detailed analysis showed the activities that most affected the monthly rate of the IPRI in the month of June.

Activities with the greatest positive contribution to the IPRI monthly rate

	Monthly rate (%)	Contribution
CNAE-09 Group		
Electric power generation, transmission and distribution	8.0	1.033
Manufacture of basic chemicals, fertilisers and nitrogen compounds. plastics and synthetic rubber in primary forms	2.1	0.063
Manufacture of vegetable and animal oils and fats	1.1	0.021

Activities with the greatest negative contribution to the IPRI monthly rate

	Monthly rate (%)	Contribution
CNAE-09 Group		
Refined petroleum	-1.2	-0.106
Manufacture of gas; distribution of gaseous fuels through mains	-2.2	-0.075
Manufacture of basic precious and other non-ferrous metals r	-3.7	-0.052

Results by Autonomous Community. Annual variation rates

The annual rate of the IPRI increased in nine Autonomous Communities. Región de Murcia (−2.5%), Cantabria (−0.2%), Cataluña (−2.3%) and Illes Balears (3.1%) registered the highest increases, 1.3, 0.8, 0.7 and 0.7 points, respectively.

In turn, among the Autonomous Communities to decrease their annual rate worth noting were Principado de Asturias (−0.7%), Canarias (−5.7%) and Andalucía (−0.7%), which registered decreases of 2.7, 1.2 y 1.0 points, respectively.
