Estadística de Movimientos Turísticos en Fronteras (FRONTUR)
 Septiembre 2016. *Datos provisionales*

España recibe 7,9 millones de turistas internacionales en septiembre, un 10,2% más que en el mismo mes de 2015

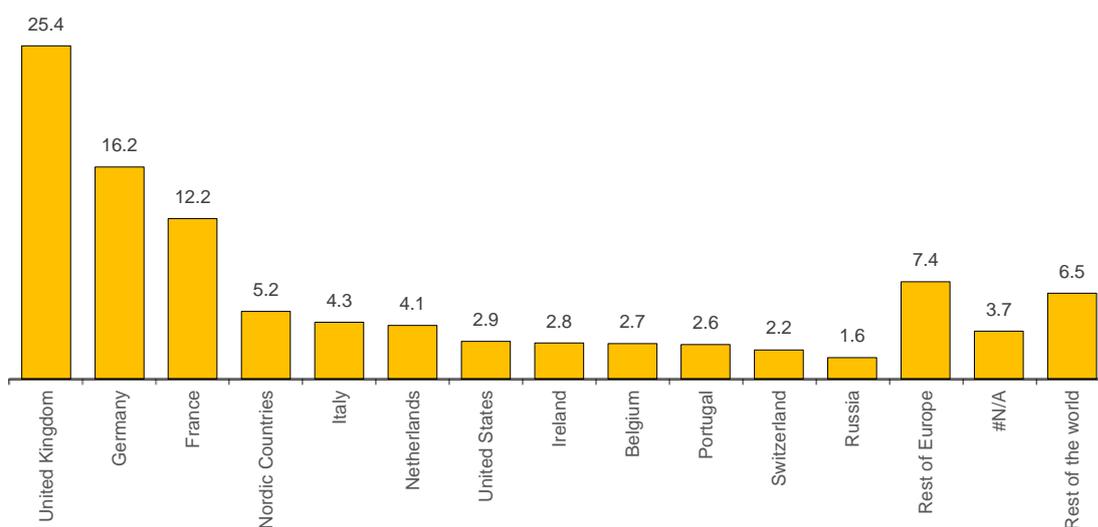

España recibe en septiembre la visita de 7,9 millones de turistas internacionales, un 10,2% más que en el mismo mes de 2015.

Reino Unido es el principal país de residencia, con más de 2,0 millones de turistas, lo que representa el 25,4% del total y un incremento del 12,8% respecto a septiembre del año pasado.

Alemania y Francia son los siguientes países de residencia con más turistas que visitan España en septiembre. Alemania aporta 1,3 millones (un 1,2% más en tasa anual) y Francia cerca de un millón (un 9,9% más).

Entre el resto de países de residencia cabe destacar los crecimientos anuales de los turistas procedentes de Irlanda (26,9%), Resto de América (38,8%) y Resto del mundo (23,1%).

International tourist arrivals by country of residence. Percentage of the total

En los nueve primeros meses de 2016 el número de turistas que visitan España aumenta un 10,1% y llega a los 60,3 millones.

Los principales países emisores en lo que va de año son Reino Unido (con 14,4 millones de turistas y un incremento del 13,0% respecto a los nueve primeros meses de 2015), Francia (con 9,3 millones de turistas y un crecimiento del 9,6%) y Alemania (con 8,9 millones de turistas y un aumento del 4,3%).

Note: does not include transit travellers or same-day visitors.

(1) No incluye viajeros en tránsito ni visitantes de un solo día sin pernoctación (excursionistas).

(2) Ver apartado metodológico sobre el enlace, al final de esta nota de prensa.

Comunidades autónomas de destino principal

Cataluña es el primer destino principal de los turistas en septiembre, con el 23,8% del total. Le siguen Illes Balears (23,6%) y Andalucía (14,1%).

A Cataluña llegan casi 1,9 millones de turistas, un 4,7% más que en septiembre del año pasado. Los principales países de residencia de los turistas en esta comunidad son Francia (con el 18,9% del total) y Reino Unido (13,6%).

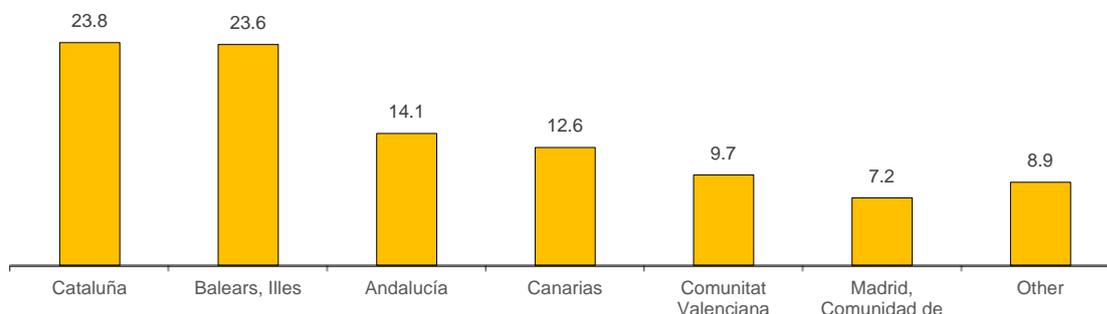

El número de turistas que visitan Illes Balears aumenta un 10,6% y se sitúa cerca de los 1,9 millones. El 33,9% procede de Alemania y el 31,3% de Reino Unido.

La tercera comunidad de destino principal por número de turistas es Andalucía, con 1,1 millones y un crecimiento anual del 12,0%. Reino Unido es el principal país de origen (con el 28,0% del total), seguido del Resto del mundo (11,3%).

En el resto de comunidades el número de turistas se incrementa un 22,5% en Comunidad de Madrid, un 15,6% en Canarias, y un 14,8% en Comunitat Valenciana.

En el acumulado de los nueve primeros meses de 2016 las comunidades que más turistas reciben son Cataluña (con casi 14,5 millones y un aumento del 4,4% respecto al mismo periodo de 2015), Illes Balears (con 11,5 millones y un crecimiento del 10,6%) y Canarias (con 9,6 millones y un incremento del 13,2%).

More than 15 nights	502,617	10.3	4,367,296	4.5

(4) Excursionists

En septiembre cerca de 5,3 millones de turistas viajan sin paquete turístico, lo que supone un incremento anual del 9,1%. Con paquete turístico llegan aproximadamente 2,6 millones, con un aumento del 12,7%.

International tourist arrivals by purchase a tourist package

	Monthly data		Accumulated data	
	Absolute value	Annual change	Absolute value	Annual change
TOTAL	7,880,118	10.2	60,345,624	10.1
No Tourist Package	5,291,439	9.1	41,946,071	7.7
Tourist Package	2,588,678	12.7	18,399,553	16.0

Methodological note

The main objective of the Survey of Tourist Movements at Borders (FRONTUR) is to monthly estimate the number of non-resident visitors in Spain that arrive to our country, whether tourists (with overnight stay) or excursionist (visitors without overnight stay), distinguishing between the different forms of access (road , airport, port and rail), as well as to know the main features of the trips made by those visitors (country of residence, main destination, type of accommodation and duration of the stay). FRONTUR follow international definitions and recommendations made by the WTO and EUROSTAT on this matter.

Different administrative sources managed by different bodies and institutions are used as population frame.

Directorate General of Traffic (DGT) provides information on the number and type of vehicles that cross the border by road. These DGT registers are complemented by a sample operation of Capacity, that allows to estimate the occupation of vehicles, according to the type and the car number plate nationality.

AENA facilitates the register of international flights operated in Spain, including the origin and destination airports, as well as the number of passengers.

State Ports provides information on the number of passengers boarded and landed in each Spanish port coming from a foreign port.

Finally, RENFE provides the complete list of trains that cross the border along with the number of passengers on the different international railway lines.

In the sample design, a series of stratum grouping border points, airports, ports or railway lines, respectively have been designed for each form of entry. In road and airport sample allocation, the day of the week in which the survey has been carried out is distinguished, discriminating between working days, weekends and holiday days. Furthermore, in airports 11 air relations are defined (origin Spanish airport-country of the destination airport) which determine as well the sample design in this form of access. The annual theoretical sample size of FRONTUR overcomes the 450,000 surveys, during the year, taking into account the seasonality of travel flows. Information is collected by direct interviews when the traveler leaves Spain, with an electronic multilingual questionnaire.

It has to be taken into account that estimates of FRONTUR are used as population to which data of the Survey on Touristic Expenditure (EGATUR), carried out by the INE too, is raised and that is compiled as a subsample methodologically included in FRONTUR.

A press note is published monthly presenting the main results, along with a series of charts that include variation rates comparing the same month of the previous year.

In the INE web site a more complete tabulation plan, with the main aggregate series, as well as the microdata file of the reference month is available to users.

Series link

The INE has carried out an updating of the methodology of the FRONTUR survey, so its results are not directly comparable with the previous series published by Turespaña up to the reference month of September 2015. Consequently, it is necessary to create a statistical link in order to build homogeneous data sets.

The link aims to capture the statistical effects due to changes in the design and other methodological changes in order to facilitate the obtaining of rates of change in the current month compared to the same month of the previous year for the main aggregates regarding inbound tourism, as if the results for the two months had been collected using the same methodology.

Thus, from October 2015, during the first 12 months after the transfer of the demand-side operations of tourism statistics FRONTUR and EGATUR from Turespaña to INE, the linked annual rates with the previous series published by Turespaña, will be disseminated calculated according to the linking statistical technique designed by INE .

The description of the linking technique, as well as the new general methodology of FRONTUR and EGATUR and the changes with regard to the previous methodology, is available at www.ine.es/en/.
