	Rest non rented accommodation	128,127	56.3	693,094	21.1

Tourists mostly stayed for four to seven nights, with almost 4.9 million and an annual increase of 1.9%. The number of visitors increased by 11.3% among those without overnight stays (excursionists) and decreased by 6.9% among tourists with longer duration (more than 15 nights).

Almost 7.1 million tourists travelled without a package tour in June, up by 2.7%. Almost 2.7 million travellers arrived with package tours, an increase of 3.3%.

Current press release at:https://www.ine.es/dyngs/Prensa/en/FRONTUR0626.htm

Autonomous communities of main destination

Illes Balears was the main destination for tourists in June, with 23.3% of the total. It was followed by Cataluña (20.8%) and Andalucía (15.7%).

Illes Balears received 0.6% more tourists than in June 2025. The number of tourists visiting Cataluña increased by 1.4% and 7.4% more tourists came to Andalucía.

International tourist arrivals by main Autonomous Community of destination. Monthly and cumulative data. June 2026

	Monthly data		Accumulated data	
	Absolute value	Annual change (%)	Absolute value	Annual change (%)
TOTAL	9,746,490	2.9	46,567,610	4.6
Andalucía	1,531,303	7.4	7,333,876	7.9
Balears, Illes	2,275,384	0.6	6,594,822	2.5
Canarias	1,030,193	-4.5	7,797,529	-0.6
Cataluña	2,023,505	1.4	9,568,845	3.5
Comunitat Valenciana	1,228,277	6.3	6,083,684	8.7
Madrid, Comunidad de	884,881	13.9	5,014,074	9.4
Rest ACs	772,947	-0.7	4,174,782	3.7

In the first six months of 2026, the communities that received the most tourists were Cataluña (9.6 million and an increase of 3.5% compared to the same period in 2025), Canarias (7.8 million and a decrease of 0.6%) and Andalucía (7.3 million, an increase of 7.9%).

Data revisions and updates

The data published today are provisional and will be revised in March next year. All the results of this operation are available at INEbase.

Current press release at:https://www.ine.es/dyngs/Prensa/en/FRONTUR0626.htm

Methodological note

The main objective of the Tourist Movement on Borders Survey (FRONTUR) is to estimate the number of non-residents visiting Spain on a monthly basis, as well as to know the main characteristics of the trips made by these visitors. The international definitions and recommendations of the UNWTO and EUROSTAT in this field are followed when preparing the FRONTUR.

Type of operation: continuous monthly statistics.

Population scope: this refers to non-residents in Spain who enter our country, whether or not they have stayed overnight, as well as those who pass through our country in transit.

Geographical scope: the entire national territory. The sample is collected at the main access points for non-resident travellers, by road, airport, port and rail.

Reference period of the results: the month.

Sample size: the annual theoretical sample size of FRONTUR exceeds 450,000 surveys, which are distributed throughout the year, taking into account the seasonality of passenger flows.

Sampling type: strata have been defined for each form of entry that group together border points, airports, ports and railway lines. In determining the road and airport sample, the day of the week in which the survey has been carried out is also identified, differentiating between working days, weekends and holidays. In airports, 21 air relations are defined (Spanish airport of origin-country of destination airport).

Collection method: information is collected by direct interview when the traveller leaves Spain, using a multilingual electronic questionnaire.

For more information, you can access the methodology and the standardised methodological report.

INE statistics are produced in accordance with the Code of Good Practice for European Statistics. More information on Quality at INE and the Code of Best Practices.
