Data revisions and updates

The INE has updated the SSAI data for the last five months. In the case of the series adjusted, the series have been reviewed from the beginning, following the INE standard. All results of this operation are available on INEBase.

In accordance with Commission Delegated Regulation (EU) 2023/137, the INE has begun to work on incorporating the new National Classification of Economic Activities NACE-2025 in all of its statistical operations.

In the case of the SSAI, the first publication of results with NACE-2025 will take place in March 2028.

Methodological note

The **Services Sector Activity Indicators (SSAI)** measure the short-term evolution of the activity of companies belonging to the Non-Financial Market Services sector through two variables: turnover and employed personnel. Turnover comprises the amounts invoiced by the company for provision of services and sale of goods. Employed personnel include both paid and unpaid personnel.

In order to obtain this data, an ongoing survey is conducted, every month researching more than 27,000 companies that operate in this sector. Results are presented as indices so as to measure variations as compared to the base year 2021.

Type of survey: continuous monthly survey.

Base year: 2021.

Population scope: companies whose main activity is described in sections G, (Commerce), H (Transportation and Storage), I (Hospitality), J (Information and Communications), L (Real Estate Activities), M (Professional Activities, Scientific and Technical) and N (Administrative Activities and Auxiliary Services) of the National Classification of Economic Activities (CNAE-09).

Geographic scope: all the national territory except for Ceuta and Melilla, for which it is only collected in division 47 of CNAE-09 (retail trade).

Sample size: 27,500 companies

Sampling type: stratified random sampling.

Collection method: internet (IRIA system), administrative register, e-mail, fax, telephone or by postal mail.

More information on the methodology and the standardised methodological report.

INE statistics are produced in accordance with the Code of Good Practice for European Statistics. More information on Quality at INE and the Code of Best Practices.
