Revisions and update of data

On the press release day, INE has updated RTI data series corresponding to the last three months. In the case of calendar adjusted and seasonally and calendar adjusted series, according to INE standard, series are revised since its beginning. Results are available on [INEbase](#).

Methodological note

The main objective of the **Retail Trade Indices (RTI)** is to ascertain the fundamental characteristics of the companies engaged in retail trade in Spain, which make it possible to measure, in the short term, the trend of activity in the sector.

Survey type: continuous monthly survey.

Base year: 2021.

Population scope: companies whose main activity is included within division 47 of the CNAE-2009 Retail trade, except of motor vehicles and motorcycles.

Geographical scope: the whole country.

Sample size: Approximately 12,000 companies.

Type of sampling: stratified random sampling.

Collection method: fill in a questionnaire by the respondent using one of the following methods: internet (IRIA system), e-mail, fax, telephone or by post.

Further information is available in the [methodology](#) and in the [standardised methodological report](#).

INE statistics are produced in accordance with the Code of Good Practice for European Statistics. More information in [Quality at INE](#) and the [Code of Best Practices](#).
