Consumer Price Index (CPI). Base 2006

April 2007

General index

	Monthly variation	Accumulated variation	Interannual variation
April 2007	1.4	1.5	2.4

Main results

- The **interannual variation** rate of the **CPI** in **April** decreases one tenth, reaching **2,4%**.
- The **yearly** rate of **core** inflation is **2.5%**, the same as in March.
- Monthly **variation** of the general index is **1.4%**.
- The **Harmonised Consumer Price Index** (HCPI) shows an **annual rate** of **2.5%**, the same as in the previous month.

Interannual Variation Rates

The interannual rate for the general Consumer Price Index (CPI) in April is **2.4%**, one tenth less that registered in February.

By groups, those that stand out for their greater increases or decreases in annual rates are the following:

- **Food and non-alcoholic beverages**, increasing its annual rate by three tenths, standing at **3.2%**. This behaviour is mainly due to *poultry meat* upwards price evolution, as compared with the sharp drop it registered had last year.
- **Hotels, cafes and restaurants**, whose annual rates goes from 4,7%, last March, up to **5,0%** in April, as prices for its components have had a greater growth than in April 2006.
- **Housing**, which decreases its annual variation by seven tenths, standing at **3,2%**, mainly as a result of the *gas* prices drop in comparison with the rise in April of the previous year. In fact, the annual rate for *gas* drops from 3.8% in March down to -3.0% in April, showing a negative trend for the first time since September 2004.
- **Recreation and culture**, showing a **-0,4%**, annual rate, five tenths below that for March. This drop has resulted as *organised trip* prices have had a milder rise this year than in April 2006.

A more detailed analysis shows the divisions that had a greater impact in the increase of annual rates in the *Food and non-alcoholic beverages* and *Hotels, cafes and restaurants* groups during April are:

	Annual rate (%) Feb-07	Annual rate (%) March-07	Difference
Division			
Poultry meat	9.4	19.0	9.7
Hotels and other accommodation	5.7	6.4	0.7
Restaurants, bars, cafes, canteens and dining halls	-4.6	-4.8	0.2

Likewise, the most influential divisions over the *housing* and *recreation and culture* groups rate evolution are the following:

	Annual rate (%) Feb-07	Annual rate (%) March-07	Difference
Division			
Gas	3.8	-3.0	-6.8
Organised travel	3.0	0.3	-2.7

The interannual variation rate of **core inflation** (general index without unprocessed food or energy products) remains at **2,5%**, a rate which once again surpasses the general index.

Annual Evolution of the CPI, base 2006

General and Core

Inter-monthly variation rates

The inter-monthly variation rate of the CPI in April is **1.4%**.

Amongst the groups with the most relevant positive effect in the general index we find the following:

- **Clothing and footwear**, with a monthly rate of **9.3%**, covering the performance of prices in the last month of the spring-summer sales period. Its impact on the general CPI for April is **0.760**.
- **Transport**, with a monthly rate of **1.4%** has an effect of **0.205** on the general index. This behaviour is mainly due to the increase in prices in *fuels and lubricants*.
- **Hotels, cafes and restaurants**, with a **1.2%** variation, which translates into a **0.136** increase. Most of the components in this group show price increases.
- **Food and non-alcoholic beverages**, whose **0.6%** monthly rise has been mainly caused by *poultry meat* price increases. It accounts for a **0.126** increase.

The only group showing a negative monthly effect over the month of March is the following:

- **Communications**, with a **-0.2%** monthly rate, which includes the price drop in *telephone equipment*. Its impact on the general CPI rate for April is **-0.007**.

Monthly Evolution of the CPI, base 2006 General Index

Details of inter-monthly variations

A more detailed analysis shows the divisions that had a greater impact in the monthly CPI rate during April.

The divisions with the greatest positive effect on the monthly rate were:

	Monthly rate (%)	Effect
Food		
Poultry meat	5.7	0.048
Dried pulses and fresh vegetables	1.4	0.015
Potatoes and its by-products	2.8	0.011
Other divisions		
Clothing garments	10.0	0.611
Fuels and lubricants	3.3	0.187
Footwear	8.1	0.145
Restaurants, bars, cafes, canteens and dining halls	0.7	0.073
Hotels and other accommodation	8.9	0.063
Organised trips	3.9	0.049

Likewise, the divisions with the greatest negative effect were the following:

	Monthly rate (%)	Effect
Food		
Oils	-0.5	-0.004
Other divisions		
Gas	-1.8	-0.023

Autonomous Communities. Annual variation rates

Annual variations in general CPI in the Autonomous Communities appear in the following graph:

Harmonised Consumer Price Index (HCPI)

In the month of April, the HCPI shows an interannual variation rate of **2.5%**, the same as in March. This rate is the same as that estimated by the leading index for HCPI, published on 27th April.

The monthly rate of HCPI is of **1.4%**.
