**Consumer Price Index (CPI). Base 2016**  
**Harmonised Index of Consumer Prices (HICP). Base 2015**  
June 2019

**Main results**

- The annual variation rate of the CPI in the month of June is 0.4%, four tenths lower than that registered the previous month.
- The annual rate of core inflation increases two tenths, reaching 0.9%.
- The monthly variation of the general index is -0.1%.
- The Harmonised Index of Consumer Prices (HICP) places its annual rate at 0.6%, which decreases three tenths as compared with the month of May.

**Annual evolution of consumer prices**

The annual rate of the general Consumer Price Index (CPI) in the month of June is 0.4%, four tenths lower than that recorded the previous month.

The groups which most contributed to this decrease in the annual change were:

- **Transport**, which presents an annual variation of 0.0%, almost two points lower than last month. This is due to the decline in *fuel and lubricant* prices this month, compared to the increase in June 2018.
- Housing, the rate of which fell by more than one point to -1.5% as a result of lower *electricity and liquid fuel* prices, which increased in 2018.

For its part, the group that stands out for its positive influence on the annual rate is:

- **Leisure and culture**, which places its rate at -0.4%, eight tenths above that of May, mainly as a result of the increase in prices of *tourist packages*, higher than in 2018.

**Influence of groups on the annual CPI rate**

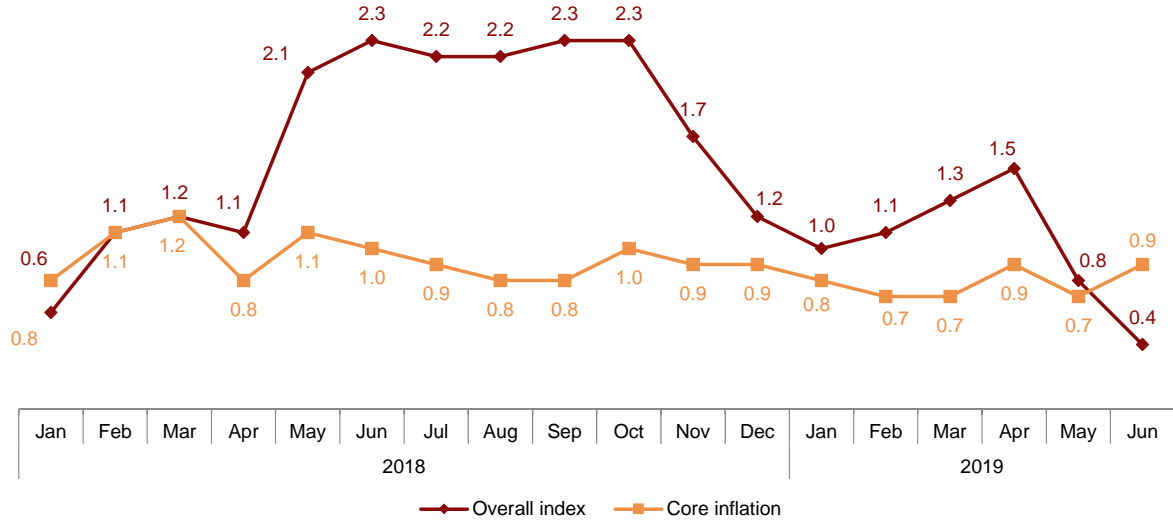

**Overall annual CPI rate difference** -0.4

The annual rate of change in core inflation (the general index excluding unprocessed food and energy products) increases by two tenths to 0.9%, which is five tenths above that of the overall CPI. The annual rate of core inflation was no higher than that of the overall CPI since January 2018.

## Annual rate of CPI

Overall and core index. Percentage

## Monthly evolution of consumer prices

In June, the monthly change of the overall CPI was -0.1%.

## Monthly rate of CPI

Overall index Percentage

The groups with the greatest negative impact on the monthly CPI rate are:

- **Transport**, whose variation of -1.4% is reflected in -0.222, due to the fall in *fuel* prices.
- **Clothing and footwear**, with a rate of -1.3%, which reflects the behaviour of prices at the beginning of the spring-summer sales period. The impact of this group on the overall CPI is -0.083.
- **Housing**, which stands at -0.6% and has an impact of -0.080, as a result of the fall in *electricity* and, to a lesser extent, *gas* prices.

On the other hand, the groups with the greatest positive impact on the general index are:

- **Recreation and culture**, with a variation rate of 1.7% and a contribution of 0.140, explained almost entirely by the increase in the prices of *package holidays*.
- **Food and non-alcoholic beverages**, with a rate of 0.4% and an impact of 0.074, motivated by the increase in *fruit* and, to a lesser extent, *meat* prices.

Also noteworthy, although in the opposite direction, are the declines in prices of *fish* and *seafood*, *vegetables* and *oils* and *fats*.

A more detailed analysis shows the divisions that most affected the monthly rate of the CPI during the month of June.
