## Annual Change

The annual change for the overall Consumer Price Index (CPI) in November was **4.1%**, five tenths greater than that registered in October.

By groups, those that stood out for their greater annual changes were the following:

- **Transport**, whose annual change increased from 4.9% in October to **6.6%** in November. This behaviour was largely due to the increase in *Fuels and lubricants for personal transport equipment* prices, as compared with the decreases recorded in November 2006.
- **Food and non-alcoholic beverages**, whose change increased to **6.3%**, up from the 5.5% recorded in October. The divisions which stood out due to their influence on this change were *Milk, Cheese, Sheep meat* and *Other milk-based products*.
- **Housing**, whose annual change increased five tenths, standing at **4.7%**. This behaviour was mainly due to the increase in the price of *Heating fuels*, as compared with the decreases recorded in November of last year.
- **Education**, whose annual change decreased four tenths, standing at **4.1%**. This pattern was largely due to the lesser rise in prices for *Pre-primary education* than in November 2006.

A more detailed analysis showed that the divisions that had the greatest influence on the annual increase of *Transport, Food and non-alcoholic beverages* and *Housing* in November were:
