

## Industrial Price Index. Base 2015

March 2022. Provisional data

**The annual variation of the Industrial Price Index rose nearly five points, to 46.6%**

**The monthly rate of industrial prices was 6.6%**

### Annual evolution of industrial prices

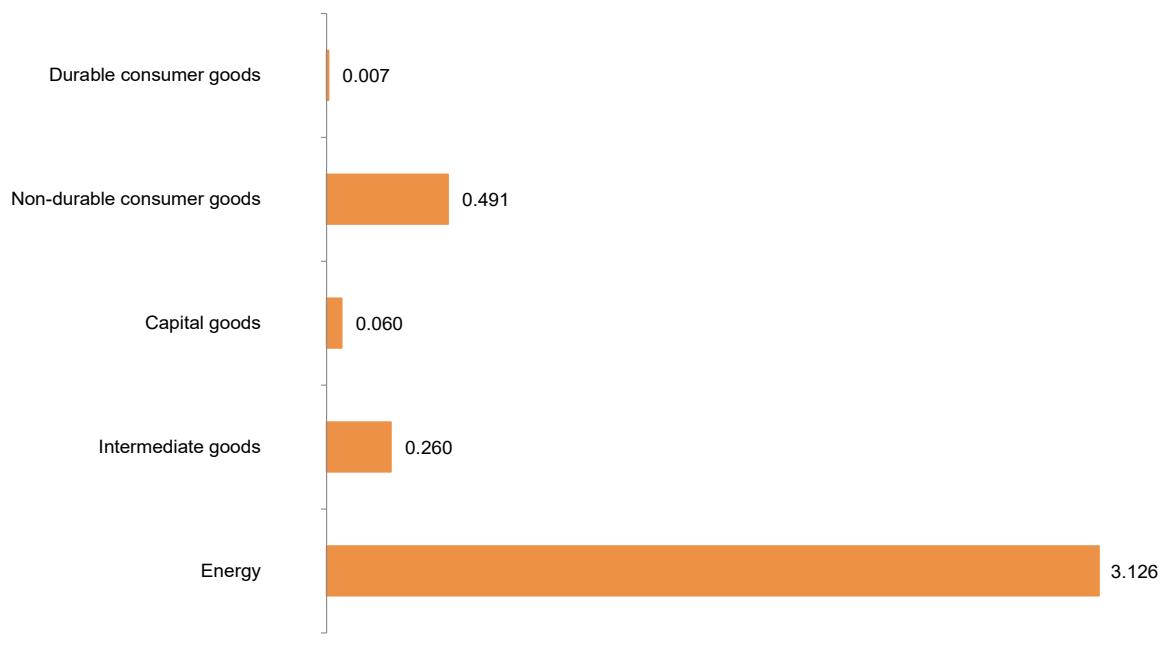

The annual rate of the general Industrial Price Index (IPRI) in March was 46.6%, five points above that registered in December and the highest since the start of the series, in February 1976.

By the economic destination of the goods, all the industrial sectors had a positive effect on the annual rate of the General IPRI. Among them, worth noting were:

- **Energy**, whose rate increased by more than 18 points, to 134.6%. This was the highest since the beginning of the series, due to increases in the prices of the *Manufacture of refined petroleum products* and *Electric power generation, transmission and distribution*, which were higher this month than in March 2021.
- **Non-durable consumer goods** had an annual variation of 8.6%. This was more than two points above that of the previous month, and was due to the fact that the prices of the *Manufacture of vegetable and animal oils and fats* and, to a lesser extent, of the *Processing and preserving of meat and production of meat products*, increased more in March 2022 than the previous year.
- **Intermediate goods**, whose rate increased by more than one point, to stand at 22.9%. In this evolution, the rise in the prices of the *Manufacture of basic iron and steel and of ferro-alloys* and the *Manufacture of prepared animal feeds* stood out, due to being higher this month than in 2021.

While in the opposite direction, it should be noted that the prices of the *Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms* rose more in 2021 than this month.

## Contribution of industrial sectors to the annual rate of the IPRI

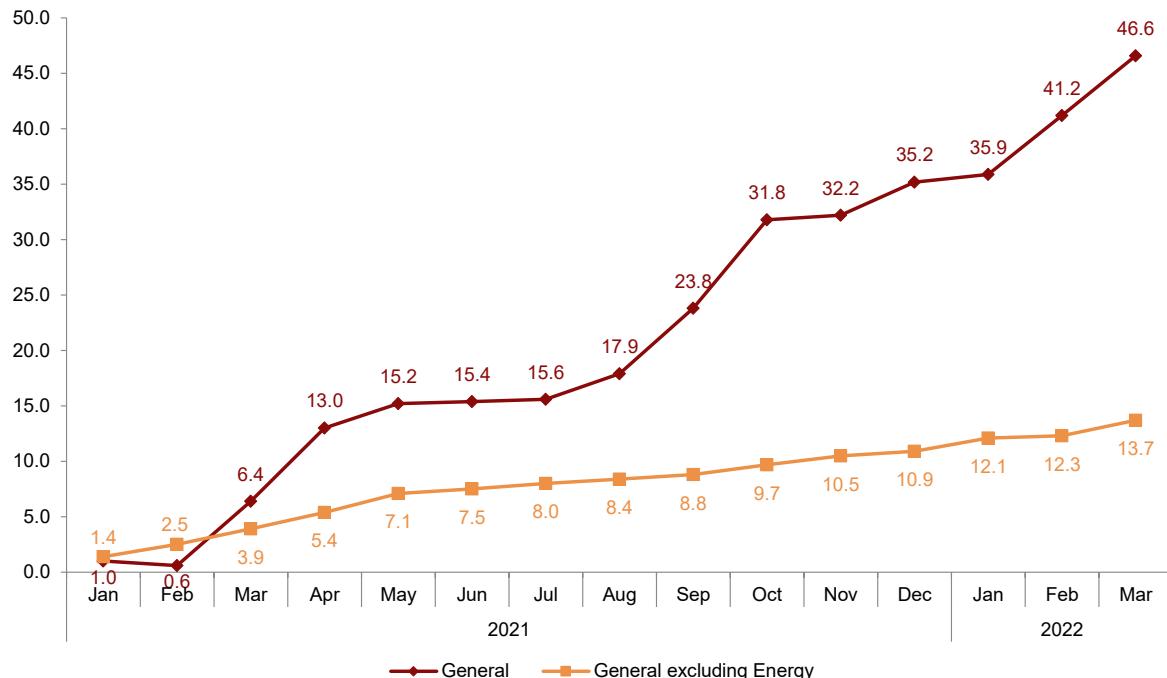

**Annual rate difference IPRI** **5.4**

The annual variation rate of the general index excluding Energy increased by more than one point, to 13.7%, nearly 33 points below that of the general IPRI. This rate is the highest since June of 1984.

## Annual evolution of the IPRI

General index and general index without Energy Percentage

## Monthly evolution of industrial prices

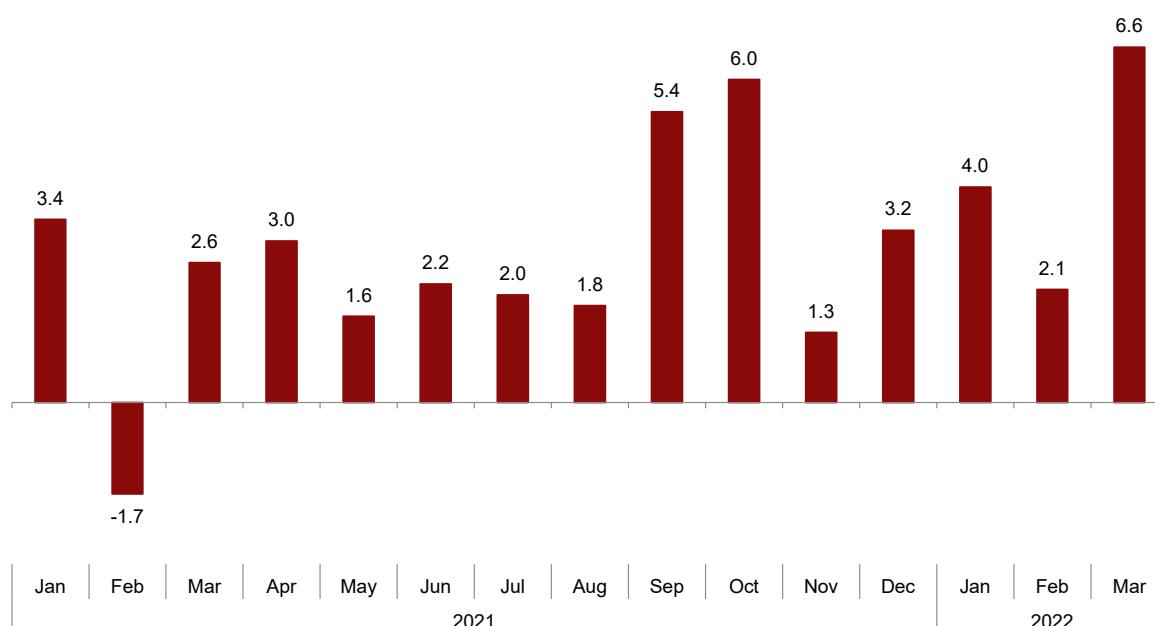

In March, the monthly variation of the overall IPRI was 6.6%.

By economic destination of the goods, all the industrial sectors presented a positive monthly contribution. Among them, worth noting were:

- **Energy**, which registered a monthly rate of 15.2% and an impact of 4.951. This was caused by increases in the prices of *Refined petroleum products*, of the *Production, transport and distribution of electric energy*, and, to a lesser extent, of *Gas Production; distribution by pipeline of gaseous fuels*.
- **Intermediate goods**, with a variation of 2.8%. Worth noting in this evolution was the increase in the prices of *Manufacture of basic iron and steel and of ferro-alloys* and of *Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms*. This sector's contribution to the overall index was 0.827.
- **Non-durable consumer goods** had a rate of 2.8% and a contribution of 0.707. This was primarily a consequence of the decrease in the prices of *Manufacture of vegetable and animal oils and fats* and of *Processing and preserving of meat and production of meat products*.

## Monthly evolution of the IPRI

General index. Percentage

A more detailed analysis showed the activities that most affected the monthly rate of the IPRI in the month of March.

**Activities with the greatest positive contribution to the monthly rate of the IPRI**

| Activity (CNAE-09 groups)  | Monthly rate (%) | Contribution |
|--|------------------|--------------|
| Manufacture of refined petroleum products  | 29.2             | 2,413        |
| Electric power generation, transmission and distribution   | 14.9             | 2,348        |
| Manufacture of vegetable and animal oils and fats  | 14.2             | 0,365        |
| Processing and preserving of meat and production of meat products  | 4.1              | 0,192        |
| Manufacture of gas; distribution of gaseous fuels through mains  | 2.6              | 0,188        |
| Manufacture of basic iron and steel and of ferro-alloys  | 7.5              | 0,163        |
| Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms | 3.4              | 0,137        |
| Manufacture of prepared animal feeds   | 3.3              | 0,088        |
| Manufacture of basic precious and other non-ferrous metals   | 3.9              | 0,071        |
| Manufacture of plastic products  | 1.9              | 0,046        |
| Manufacture of pulp, paper and paperboard  | 5.7              | 0,039        |
| Manufacture of structural metal products   | 2.4              | 0,037        |
| Manufacture of other chemical products   | 5.3              | 0,035        |
| Manufacture of bakery and farinaceous products   | 1.9              | 0,032        |

**Activities with the greatest negative contribution to the monthly rate of the IPRI**

| Activity (CNAE-09 groups)                               | Monthly rate (%) | Contribution |
|---|------------------|--------------|
| Manufacture of motor vehicles                           | -0.9             | -0,024       |
| Manufacture of air and spacecraft and related machinery | -0.7             | -0,003       |
| Installation of industrial machinery and equipment      | -0.8             | -0,002       |

## Results by Autonomous Communities. Annual variation rates

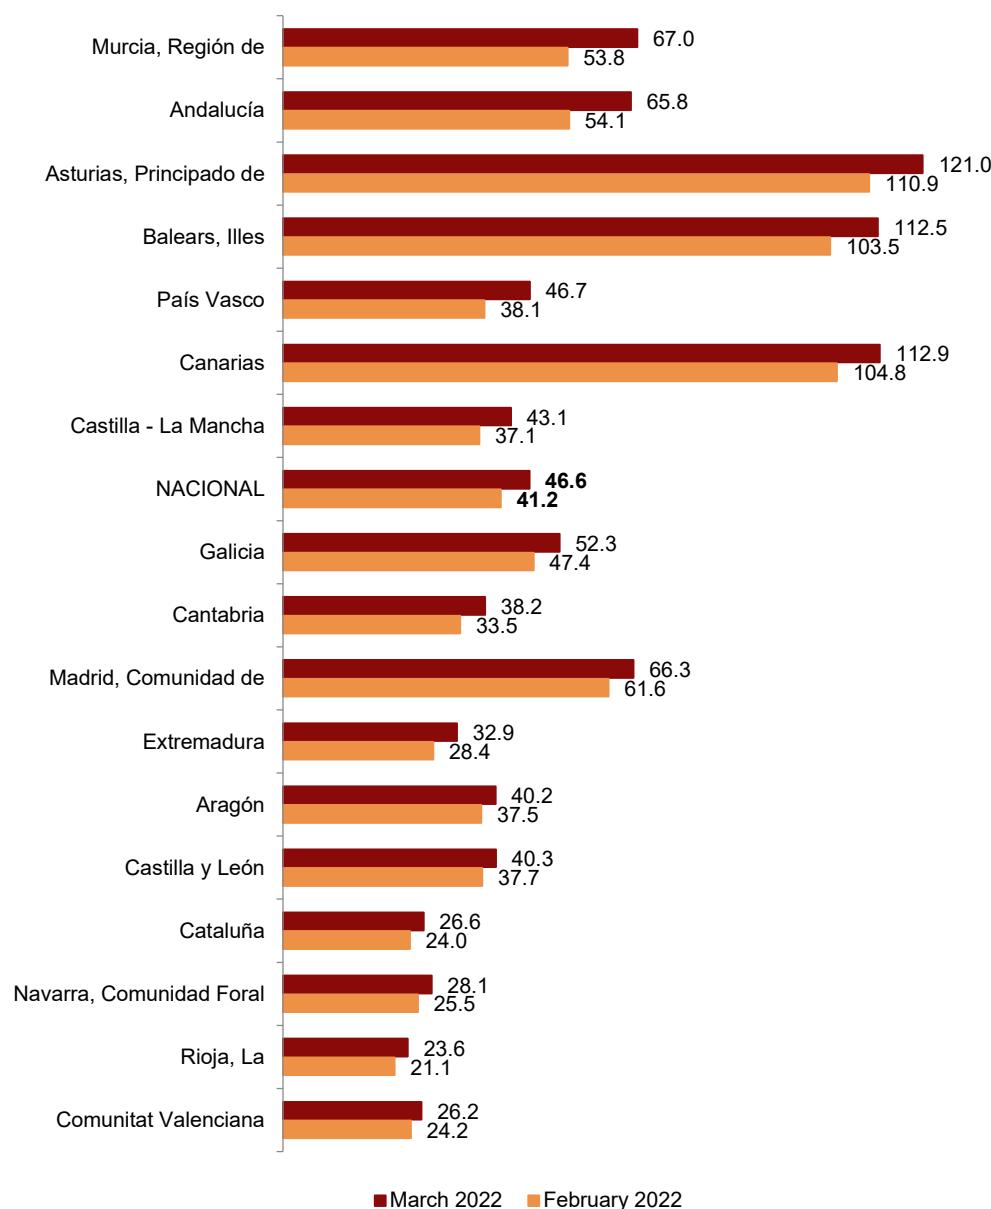

The annual rate of the IPRI increased in March compared to February in all the Autonomous Communities.

The greatest increases were registered in Región de Murcia and Andalucía, with increases of 13.2 and 11.7 points, respectively.

On the other hand, Comunitat Valenciana and La Rioja were the communities that increased their rates the least, with increases of 2.0 and 2.5 points, respectively.

## Data Review and Update

Coinciding with today's publication, the INE has updated the data of the IPRI series corresponding to the last three months, with the month of December 2021 becoming definitive. The results are available at INEBase.

## Methodological note

The Industrial Price Index (IPRI) is a short-term indicator that measures the monthly evolution of the prices of industrial products manufactured and sold in the domestic market, in the first step of their commercialisation, that is to say, at ex-factory prices, excluding transport and commercialisation costs and invoiced VAT.

**Type of survey:** monthly continuous survey.

Base year: 2015.

**Reference period of the weightings:** the year preceding the current year

**Population scope:** industrial workplaces

**Sample size:** 9,000 industrial establishments and 1,500 items.

**Number of observations:** approximately 28,000 monthly prices.

**General calculation method:** Laspeyres' Chain Index.

**Collection method:** internet (IRIA system), e-mail, fax, telephone or postal mail.

For more information the methodology can be accessed at:

[http://www.ine.es/en/daco/daco42/daco423/metoipri2015\\_en.pdf](http://www.ine.es/en/daco/daco42/daco423/metoipri2015_en.pdf)

The standardized methodological report is at:

<http://www.ine.es/dynt3/metadatos/en/RespuestaDatos.html?oe=30051>

INE statistics are produced in accordance with the Code of Good Practice for European Statistics, which is the basis for the institution's quality policy and strategy. For more information see the section on [Quality at INE and the Code of Best Practices](#) on the INE website.
