

Industrial Price Index. Base 2015
April 2021. Provisional data

The annual variation of the Industrial Price Index rose more than six points, to 12.8%

The monthly rate of industrial prices is 2.9%

Annual evolution of industrial prices

In April, the annual rate of the general Industrial Price Index (IPRI) was 12.8%, more than six points above that registered in March and the highest since June 1984.

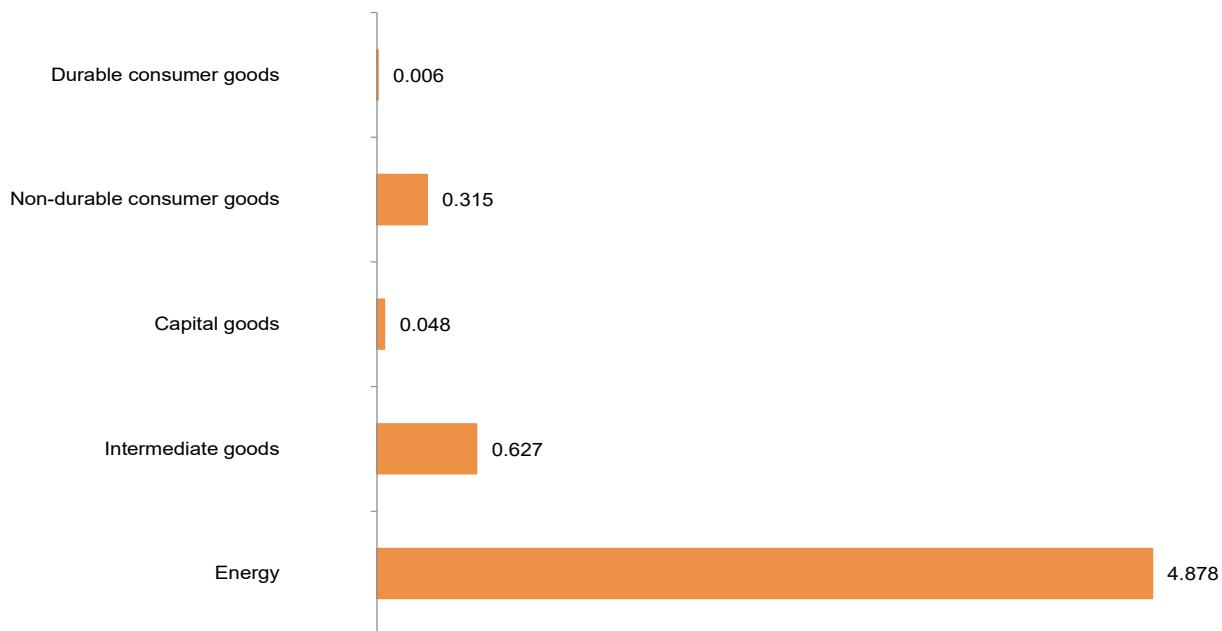

By the economic destination of the goods, all the industrial sectors had a positive effect on the annual rate of the General IPRI. Among them, worth noting were:

- **Energy**, whose annual rate increased by more than 20 points, to 33.1%. This was the highest since December 1981. This behaviour was due to the increase in the prices of *Electric power generation, transmission and distribution*, compared to the decrease registered in April of the previous year.

Also notable, although to a lesser extent, was the stability in the *Manufacture of refined petroleum products*, which decreased in 2020.

- **Intermediate goods**, with a variation of 9.9%. That was nearly two and a half points higher than the previous month, mainly due to the fact that the prices of the *Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms* increased this month, compared to their decrease in April of the previous year.
- **Non-durable consumption goods**, with a variation of 2.9%, which was more than one point higher than that registered in March. This evolution was a consequence of the rise in the prices of the *Manufacture of vegetable and animal oils and fats* and of the *Processing and preserving of meat and production of meat products*, which fell in 2020.

Contribution of industrial sectors to the annual rate of the IPRI

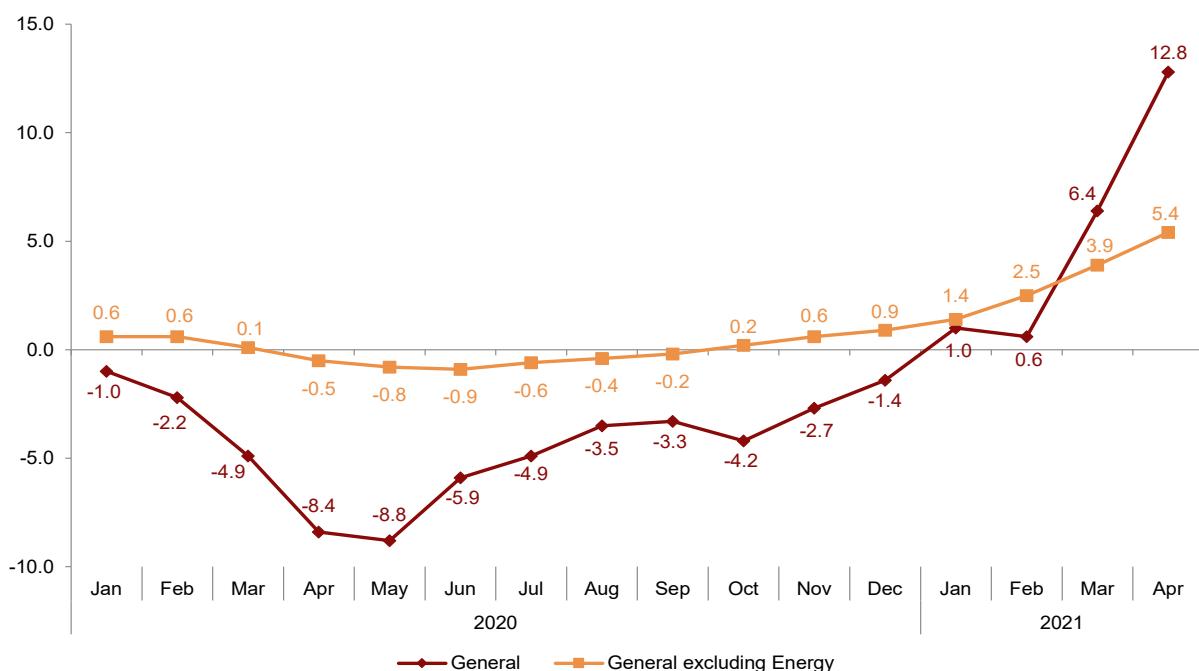

Annual Rate Difference IPRI 6.4

The annual variation rate of the general index excluding Energy increased one and a half points, to 5.4%, standing almost seven and a half points below that of the general IPRI. This rate is the highest since August 2008.

Annual evolution of the IPRI

General index and general index without Energy Percentage

Monthly evolution of industrial prices

In April, the monthly variation of the overall IPRI was 2.9%.

By economic destination of the goods, all the industrial sectors presented a positive monthly contribution. Among them, worth noting were:

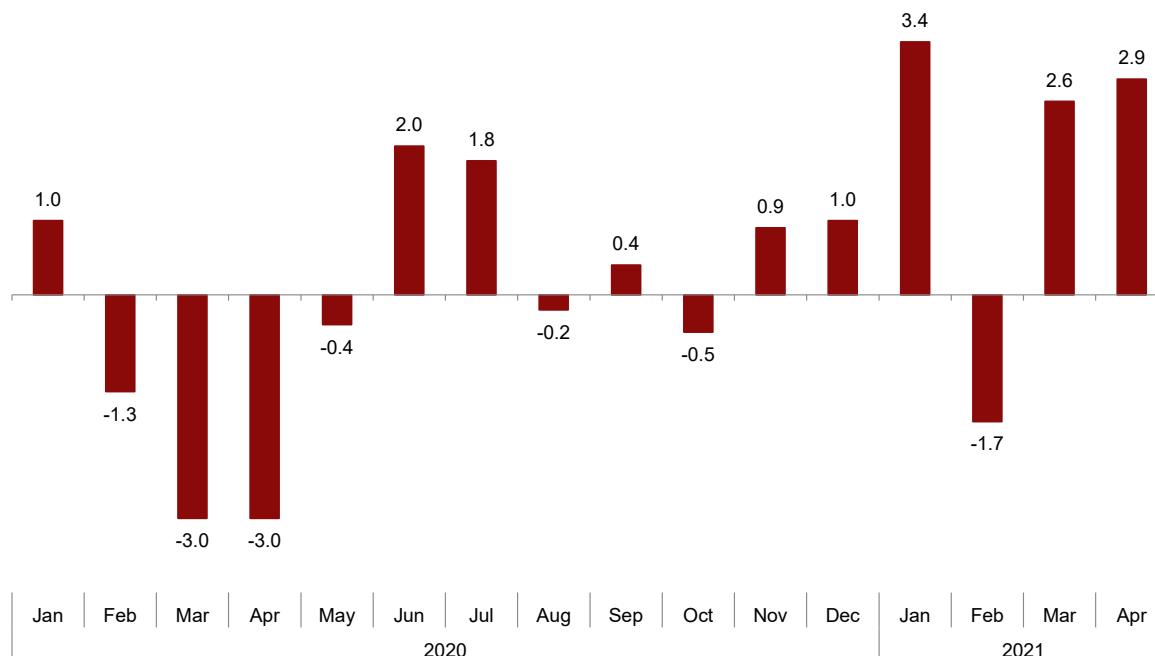

- **Energy**, with a variation of 6.9%, due to the increase in the prices of *Electric power generation, transmission and distribution*. This sector's contribution to the overall index was 2.077.

Also notable in this sector, although in the opposite direction, is the decrease in the prices of the *Manufacture of gas; distribution of gaseous fuels through mains* and of the *Manufacture of refined petroleum products*.

- **Intermediate goods**, which recorded a monthly rate of 1.6 % and a contribution of 0.452, primarily due to the increase in the prices of *Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms*.
- **Non-durable consumer goods**, with a variation of 1.0% and a contribution of 0.272, due to the increase in the prices of the *Manufacture of vegetable and animal oils and fats* and to a lesser extent, of the *Processing and preserving of meat and production of meat products*.

Monthly evolution of the IPRI

General rate Percentage

A more detailed analysis shows the activities that most affected the monthly rate of the IPRI in the month of April.

Activities with the greatest positive contribution to the monthly rate of the IPRI

Activity (CNAE-09 groups)	Monthly rate (%)	Contribution
Electric power generation, transmission and distribution	13.7	2,157
Manufacture of vegetable and animal oils and fats	9.0	0,215
Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms	5.1	0,185
Processing and preserving of meat and production of meat products	1.6	0,085
Manufacture of prepared animal feeds	1.6	0,040
Manufacture of basic precious and other non-ferrous metals	2.4	0,040
Manufacture of plastic products	1.6	0,039
Manufacture of basic iron and steel and of ferro-alloys	1.3	0,025
Manufacture of structural metal products	1.4	0,022
Manufacture of pulp, paper and paperboard	3.1	0,020
Forging, pressing, stamping and roll-forming of metal; powder metallurgy	1.4	0,015
Manufacture of railway locomotives and rolling stock	5.0	0,015

Activities with the greatest negative contribution to the monthly rate of the IPRI

Activity (CNAE-09 groups)	Monthly rate (%)	Contribution
Manufacture of gas; distribution of gaseous fuels through mains	-1.0	-0,052
Manufacture of refined petroleum products	-0.4	-0,028
Printing and service activities related to printing	-1.1	-0,014

Results by Autonomous Communities. Annual variation rates

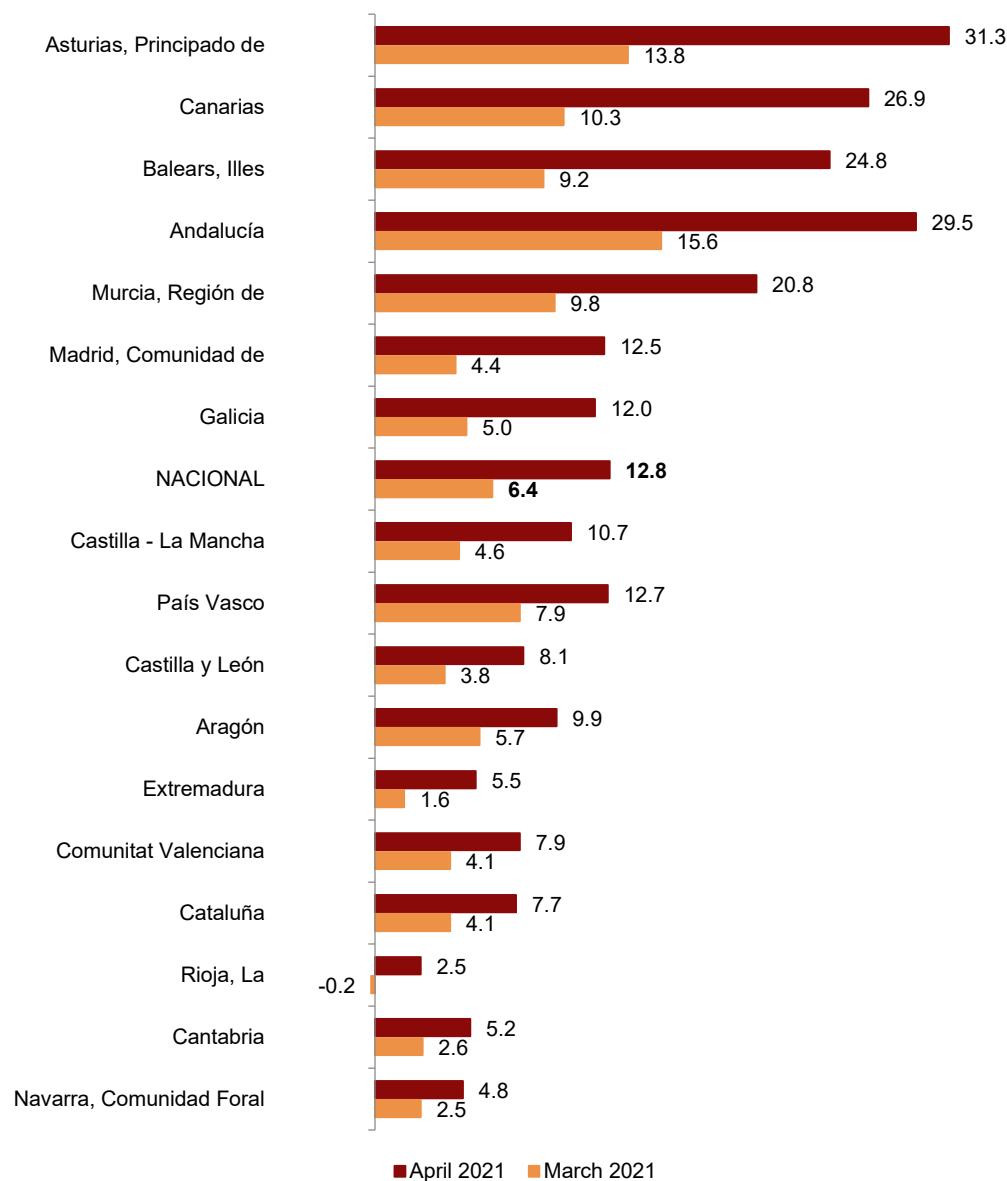

The annual rate of the IPRI increased in all the Autonomous Communities.

The greatest increases were recorded in Principado de Asturias, Canarias and Illes Balears, with increases of 17.5, 16.6 and 15.6 points respectively.

In turn, Comunidad Foral de Navarra, Cantabria and La Rioja registered the lowest increases, with increases of 2.3, 2.6 and 2.7 points respectively.

Annual variation rates of the IPRI

Data Review and Update

Coinciding with today's publication, the INE has updated the data of the IPRI series corresponding to the last three months, with the month of January 2021 becoming definitive. The results are available at INEBase.

Methodological note

The Industrial Price Index (IPRI) is a short-term indicator that measures the monthly evolution of the prices of industrial products manufactured and sold in the domestic market, in the first step of their commercialisation, that is to say, at ex-factory prices, excluding transport and commercialisation costs and invoiced VAT.

Type of survey: monthly continuous survey.

Base year: 2015.

Reference period of the weightings: the year preceding the current year

Population scope: industrial workplaces

Sample size: 9,000 industrial establishments and 1,500 items.

Number of observations: approximately 28,000 monthly prices.

General calculation method: Laspeyres' Chain Index.

Collection method: internet (IRIA system), e-mail, fax, telephone or postal mail.

For more information the methodology can be accessed at:

http://www.ine.es/en/daco/daco42/daco423/metoipri2015_en.pdf

The standardized methodological report is at:

<http://www.ine.es/dynt3/metadatos/en/RespuestaDatos.html?oe=30051>

INE statistics are produced in accordance with the Code of Good Practice for European Statistics, which is the basis for the institution's quality policy and strategy. For more information see the section Quality at INE and the Code of Best Practices on the INE website.
