

**Industrial Price Index. Base 2015**  
April 2022. Provisional data

**The annual variation of the Industrial Price Index fell two points, to  
45.0%**

**The monthly rate of industrial prices was 1.6%**

**Annual evolution of industrial prices**

The annual rate of the general Industrial Price Index (IPRI) was 45.0% in the month of April, two points below that registered in March.

Among the industrial sectors with a negative influence on the evolution of the annual rate of the General IPRI, and by the economic destination of the goods, worth noting were:

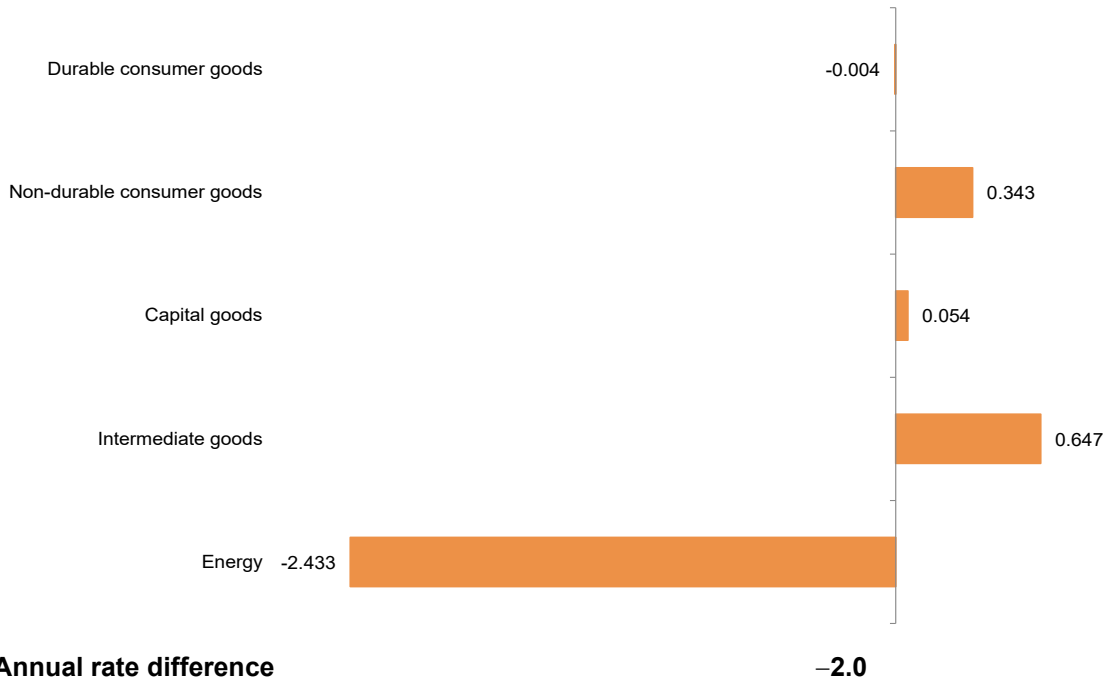

- **Energy**, whose rate decreased by 17 and a half points, to 119.0%, due to the decrease in the prices of the *Electric power generation, transmission and distribution*, which had increased in April 2021.

On the other hand, the industrial sectors with a positive influence were:

- **Intermediate goods**, whose annual variation increased nearly three points, standing at 25.6%. Worth noting in this evolution were the rises in the prices of the *Manufacture of prepared animal feed* and, to a lesser extent, of the *Manufacture of basic iron and steel and of ferro-alloys*, which was higher this month than the previous year.
- **Non-durable consumer goods** had an annual rate of 10.2%, which was more than one and a half points above that of the previous month. This was mainly due to the fact that the prices of *Processing and preserving of meat and production of meat products* increased more this month than in 2021.

Also of note, although in the opposite direction, was the increase in the prices of the *Manufacture of vegetable and animal oils and fats*, which was lower this month than the previous year.

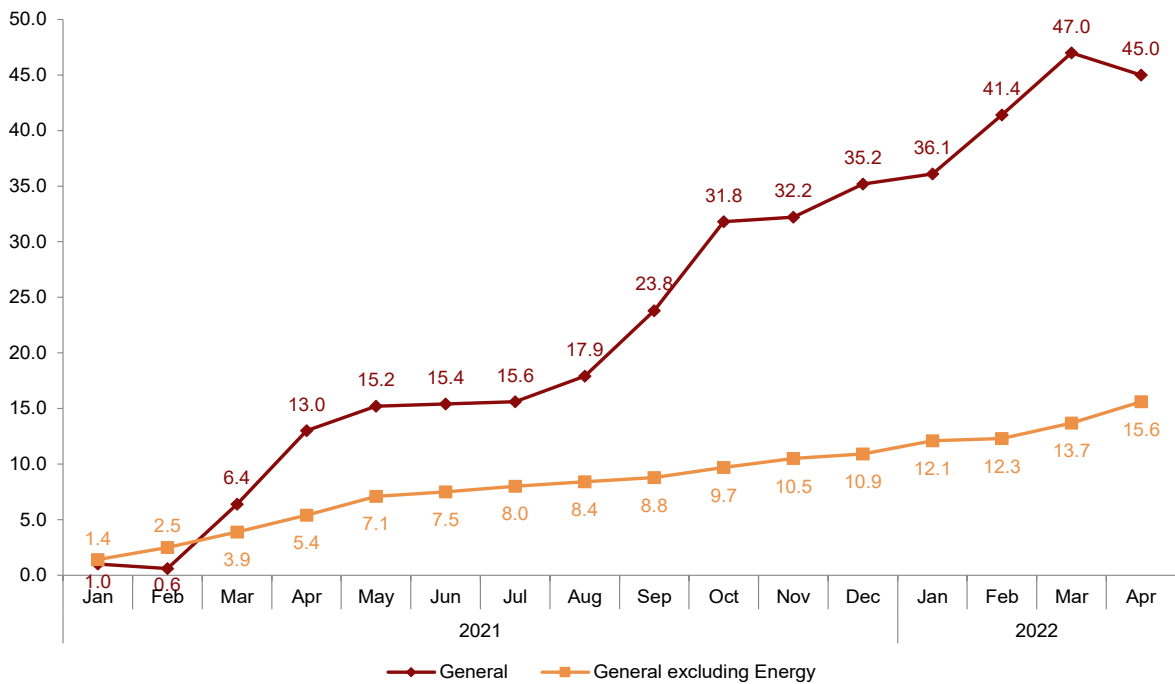

**Contribution of industrial sectors to the annual rate of the IPRI**

The annual variation rate of the general index excluding Energy increased almost two points, to 15.6%, standing nearly 29 points below that of the general IPRI. This rate is the highest since April 1980.

**Annual evolution of the IPRI**

General index and general index without Energy Percentage

### Monthly evolution of industrial prices

In April, the monthly variation of the overall IPRI was 1.6%.

By economic destination of goods, among the industrial sectors that presented a positive effect, worth noting were:

- **Intermediate goods**, with a variation rate of 4.1%, due to the increase in the prices of *Manufacture of prepared animal feeds* and *Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms*. This sector's contribution to the overall index was 1.146.

- **Non-durable consumer goods**, with a rate of 2.3% and a contribution of 0.554, mainly due to the increase in the prices of *Processing and preserving of meat and production of meat products*.

On the other hand, the only industrial sector with a negative influence was:

- **Energy**, which showed –a monthly variation of– 0.202 due to a decrease in the prices of *Electric power generation, transmission and distribution*.

Also notable in this sector, although in the opposite direction, is the increase in the prices of the *Manufacture of gas; distribution of gaseous fuels through mains* and of the *Manufacture of refined petroleum products*.

### Monthly evolution of the IPRI

General index. Percentage

A more detailed analysis shows the activities that most affected the monthly rate of the IPRI in the month of April.

**Activities with the greatest positive contribution to the monthly rate of the IPRI**

<b>Activity (CNAE-09 groups)</b>	<b>Monthly rate (%)</b>	<b>Contribution</b>
Manufacture of gas; distribution of gaseous fuels through mains	22.8	1,598
Manufacture of refined petroleum products	3.5	0,359
Processing and preserving of meat and production of meat products	6.4	0,291
Manufacture of prepared animal feeds	10.4	0,266
Manufacture of basic chemicals, fertilisers and nitrogen compounds, plastics and synthetic rubber in primary forms	6.3	0,247
Manufacture of basic iron and steel and of ferro-alloys	8.4	0,183
Manufacture of basic precious and other non-ferrous metals	4.6	0,079
Manufacture of vegetable and animal oils and fats	2.9	0,079
Manufacture of grain mill products, starches and starch products	6.2	0,048
Manufacture of motor vehicles	1.8	0,042
Manufacture of plastic products	1.7	0,041
Manufacture of articles of paper and paperboard	2.6	0,041

**Activities with the greatest negative contribution to the monthly rate of the IPRI**

<b>Activity (CNAE-09 groups)</b>	<b>Monthly rate (%)</b>	<b>Contribution</b>
Electric power generation, transmission and distribution	-12.7	-2,160
Repair of fabricated metal products, machinery and equipment	-0.6	-0,006
Manufacturing nec	-1.7	-0,002
Manufacture of other electrical equipment	-0.8	-0,001

**Results by Autonomous Communities. Annual variation rates**

Compared to March, in April the annual rate of the IPRI decreased in 13 Autonomous Communities and increased in the remaining four.

The greatest decreases were recorded in Canarias, Illes Balears and Principado de Asturias, with declines of 32.6, 29.0, and 28.6 points respectively.

On the other hand, Cataluña, Cantabria and País Vasco were the communities that increased their rates the most, with increases of 2.3, 2.2 and 2.1 points, respectively.

**Annual variation rates of the IPRI**

Index by Autonomous Community. Percentage

## Data Review and Update

Coinciding with today's publication, the INE has updated the data of the IPRI series corresponding to the last three months, with the month of January 2022 becoming definitive. The results are available at INEBase.

## Methodological note

The Industrial Price Index (IPRI) is a short-term indicator that measures the monthly evolution of the prices of industrial products manufactured and sold in the domestic market, in the first step of their commercialisation, that is to say, at ex-factory prices, excluding transport and commercialisation costs and invoiced VAT.

**Type of survey:** monthly continuous survey.

Base year: 2015.

**Reference period of the weightings:** the year preceding the current year

**Population scope:** industrial workplaces

**Sample size:** 9,000 industrial establishments and 1,500 items.

**Number of observations:** approximately 28,000 monthly prices.

**General calculation method:** Laspeyres' Chain Index.

**Collection method:** internet (IRIA system), e-mail, fax, telephone or postal mail.

For more information the methodology can be accessed at:

[http://www.ine.es/en/daco/daco42/daco423/metoipri2015\\_en.pdf](http://www.ine.es/en/daco/daco42/daco423/metoipri2015_en.pdf)

The standardized methodological report is at:

<http://www.ine.es/dynt3/metadatos/en/RespuestaDatos.html?oe=30051>

INE statistics are produced in accordance with the Code of Good Practice for European Statistics, which is the basis for the institution's quality policy and strategy. For more information see the section [Quality at INE and the Code of Best Practices](#) on the INE website.
