Review and update of data

Coinciding with today's publication, INE has updated the data corresponding to the month of June 2020, which become definitive.

¹ A stopover refers to each overnight stay made during the trip. A trip may have as many stopovers as intermediate destinations where the traveller has stayed at least one night.

Methodological note

The main objective of the Tourist Expenditure Survey (EGATUR) is to obtain monthly information on the tourist expenditure made by non-residents in Spain in their trips to our country.

For the preparation of EGATUR the international definitions and recommendations of the UNWTO and EUROSTAT in this field are followed.

Type of operation: continuous monthly statistics.

Population scope: this refers to non-residents in Spain who enter our country, whether or not they have stayed overnight, as well as those who pass through our country in transit.

Geographical scope: the entire national territory. The sample is collected at the main access points for non-resident travellers (road, airport, port and rail).

Reference period of the results: the month.

Sample size: The theoretical annual sample size of EGATUR exceeds 127,000 surveys, which are distributed throughout the year according to the seasonality of the flow of passengers and to the sample design, which is defined for each access road independently, setting a fraction of the sub-sampling from the FRONTUR sample.

Type of sampling: Single-stage, where the estimates of the FRONTUR survey are used as the target population to which the EGATUR data are elevated.

Collection method: The collection of information is carried out by direct interview when the traveler leaves Spain, using a multilingual electronic questionnaire. It must be taken into account that visitors are surveyed at the time of leaving the country, so the information collected may refer to a longer period than that of the reference month.

A more complete tabulation plan with the main series of aggregates, as well as the microdata file for the reference month, is available on the INE website.
