(\*): It is distinguished two main groups of accommodation, depending on whether there was a monetary transaction or not: rented accommodation (payment accommodation; hotels, renting accommodation, camping site, rural accommodation and other rented accommodation) or non rented accommodation (own dwelling, family or friends dwelling and other non rented accommodation)

**Stopovers on trips and overnight stays by Autonomous Communities**

Stopovers<sup>1</sup> on trips by international tourists in August decreased by 75.9% in the annual rate. Of them, 18.8% were carried out in Illes Balears (with a decrease of 81.1%).

On the other hand, the total number of overnight stays by international tourists in all types of accommodation (hotels, holiday dwellings, own homes, homes of relatives or friends, rented dwelling, etc.) reached 21.1 million, representing a decrease of 73.5%.

Comunitat Valenciana was the Autonomous Community with the most overnight stays (5.1 million, 62.1% less than in August 2019). It was followed by Illes Balears (3.5 million overnight stays and a decrease of 78.7%) and Andalucía (3.4 million, 71.8% less).

**Stopovers and overnight stays by Autonomous Community of destination**

**Review and update of data**

Coinciding with today's publication, INE has updated the data corresponding to the month of August 2019. The results are available at INEBase.

<sup>1</sup> A stopover refers to each overnight stay made during the trip. A trip may have as many stopovers as intermediate destinations where the traveller has stayed at least one night.

## **Note regarding COVID-19's impact on the statistical operations FRONTUR and EGATUR in August 2020**

The end of the state of alarm in force since March 17, 2020 has not meant the suppression of access controls to Spain through the different routes, so that, although since June 21 it is no longer in force, they have happened different orders that have restricted the free access of travelers to Spain. In the month of August, the current regulations, which to a large extent had already been established in the preceding months, are those collected by Order INT / 657/2020, of July 17, *by which the criteria for the application of a temporary restriction of non-essential trips from third countries to the European Union and Schengen associated countries are modified for reasons of public order and public health due to the health crisis caused by COVID-19.* (BOE n. 196, July 18), modified by Order INT / 734/2020, of July 30, (BOE n. 207, July 31) and Order INT / 805/2020, of August 28, (BOE n. 232, August 29).

These orders establish access restrictions from third countries, establishing a specific list of countries, whose residents are not affected by the restrictions. This list is being updated in different orders depending on the health evolution of the different countries.

Therefore, in determining the number of visitors estimated by the FRONTUR-EGATUR statistics, a series of restrictions consistent with the aforementioned orders have been taken into account.

These restrictions have been limited to the port and airport access routes, where visitors who access Spain from third countries outside the European Schengen area have not been considered, beyond the countries explicitly detailed in the orders mentioned above.

However, both the exceptions established by the aforementioned provisions and the way in which data collection is carried out determine that there are some aspects of the operation that must be taken into account in August, consistent with their treatment in the preceding months.

Citizens of Spanish nationality residing in other countries are allowed access to Spanish territory, even outside the list of countries mentioned above, as well as other travelers with justified cause that could be considered, in some cases, visitors. However, the small volume of these flows and the impossibility of their accurate characterization advise against their accounting.

Throughout the month of August the survey process has continued, despite the new conditions of access to the places where it occurs and the interviewees themselves, derived from the health crisis, have not yet allowed its full development, for what the possible difficulties derived from this fact are being solved with the usual sample complement mechanisms designed by the own methodology of this statistical operation.

Taking all these aspects into account, it has been possible to build, with sufficient guarantee, the usual monthly estimators and, therefore, **the INE considers that the data provided by the statistics of FRONTUR and EGATUR are of sufficient quality to be disseminated and used by regular users of these operations.**

## Methodological note

The main objective of the Tourist Expenditure Survey (EGATUR) is to obtain monthly information on the tourist expenditure made by non-residents in Spain in their trips to our country.

For the preparation of EGATUR the international definitions and recommendations of the UNWTO and EUROSTAT in this field are followed.

**Type of operation:** continuous monthly statistics.

**Population scope:** this refers to non-residents in Spain who enter our country, whether or not they have stayed overnight, as well as those who pass through our country in transit.

**Geographical scope:** the entire national territory. The sample is collected at the main access points for non-resident travellers (road, airport, port and rail).

**Reference period of the results:** the month.

**Sample size:** The theoretical annual sample size of EGATUR exceeds 127,000 surveys, which are distributed throughout the year according to the seasonality of the flow of passengers and to the sample design, which is defined for each access road independently, setting a fraction of the sub-sampling from the FRONTUR sample.

**Type of sampling:** Single-stage, where the estimates of the FRONTUR survey are used as the target population to which the EGATUR data are elevated.

**Collection method:** The collection of information is carried out by direct interview when the traveler leaves Spain, using a multilingual electronic questionnaire. It must be taken into account that visitors are surveyed at the time of leaving the country, so the information collected may refer to a longer period than that of the reference month.

A more complete tabulation plan with the main series of aggregates, as well as the microdata file for the reference month, is available on the INE website.
