Expenditure items

The expenditure on activities was the most important items, representing 21.6% of the total expenditure and an increase of 687.2% with respect November 2020.

The following items were expenditure on international transport and on accommodation, which accounted for 18.3% and 17.6% of the total, respectively. The former increased by 681.9% in the annual rate and the latter by 679.7%.

International tourist expenditure by expenditure categories

	November 2021		
	Total (millions of euros)	Percentage	Annual variation
TOTAL	3,748	100.0	677.6
Expenditure on tourist package	598	16.0	705.8
Expenditure excluded on tourist package	3,150	84.0	672.5
- Expenditure on international transport	686	18.3	681.9
- Expenditure on accommodation	658	17.6	679.7
- Expenditure on food and drinks	633	16.9	690.1
- Expenditure on activities	811	21.6	687.2
- Other expenditure	361	9.6	589.2

Main type of accommodation, method of organization and main reason for the trip

63.7% of total tourist expenditure in November was made by tourists staying at hotels, with an annual increase of 709.5%. On the other hand, expenditure in non-rented accommodation increased by 933.7%.

Expenditure by tourists not travelling with a tourist package (which represented 77.0% of the total) increased by 674.1% in the annual rate. For those who contract a tourist package, it increased by 689.6%.

In terms of the reasons for travel, tourists visiting Spain for leisure generated 83.7% of the total expenditure (spending 859.4% more than in November 2020).

International tourist expenditure by main type of accommodation, type of organization and main purpose of the trip

(*): It is distinguished two main groups of accommodation, depending on whether there was a monetary transaction or not: rented accommodation (payment accommodation; hotels, renting accommodation, camping site, rural accommodation and other rented accommodation) or non rented accommodation (owned dwelling, family or friends dwellings and other non rented accommodation)

Stopovers on trips and overnight stays by Autonomous Communities

Stopovers¹ on trips by international tourists in November increased by 642.2% in the annual rate. Of them, 28.1% were carried out in Canarias (with an increase of 542.4%).

On the other hand, the total number of overnight stays by international tourists in all types of accommodation (hotels, holiday dwellings, own homes, homes of relatives or friends, rented dwelling, etc.) exceed 26.3 million, representing an increase of 580.1%.

Canarias was the Autonomous Community with the most overnight stays (more than 8.9 million, 548.9% more than in November 2020). It was followed by Andalucía (nearly 4.9 million and an increase of 741.9%) and Comunitat Valenciana (nearly 3.8 million, 562.1% more).

¹ A stopover refers to each overnight stay made during the trip. A trip may have as many stopovers as intermediate destinations where the traveller has stayed at least one night.

Stopovers and overnight stays by Autonomous Community of destination

	November 2021

Revision and updating of data

The data published today are provisional and will be revised on March this year. The results are available at INEBase.

Methodological note

The main objective of the Tourist Expenditure Survey (EGATUR) is to obtain monthly information on the tourist expenditure made by non-residents in Spain in their trips to our country.

For the preparation of EGATUR the international definitions and recommendations of the UNWTO and EUROSTAT in this field are followed.

Type of operation: continuous monthly statistics.

Population scope: this refers to non-residents in Spain who enter our country, whether or not they have stayed overnight, as well as those who pass through our country in transit.

Geographical scope: the entire national territory. The sample is collected at the main access points for non-resident travellers (road, airport, port and rail).

Reference period of the results: the month.

Sample size: The theoretical annual sample size of EGATUR exceeds 127,000 surveys, which are distributed throughout the year according to the seasonality of the flow of passengers and to the sample design, which is defined for each access road independently, setting a fraction of the sub-sampling from the FRONTUR sample.

Type of sampling: Single-stage, where the estimates of the FRONTUR survey are used as the target population to which the EGATUR data are elevated.

Collection method: The collection of information is carried out by direct interview when the traveler leaves Spain, using a multilingual electronic questionnaire. It must be taken into account that visitors are surveyed at the time of leaving the country, so the information collected may refer to a longer period than that of the reference month.

A more complete tabulation plan with the main series of aggregates, as well as the microdata file for the reference month, is available on the INE website.

For more information you can access the methodology at:

http://www.ine.es/en/daco/daco42/frontur/frontur_egatur_metodologia_en.pdf

And the standardised methodological report at:
