(\*): It is distinguished two main groups of accommodation, depending on whether there was a monetary transaction or not: rented accommodation (payment accommodation: hotels, renting accommodation, camping site, rural accommodation and other rented accommodation) or non rented accommodation (own dwelling, family or friends dwellings and other non rented accommodation)

## Stopovers on trips and overnight stays by Autonomous Communities

Stopovers<sup>1</sup> on trips by international tourists in November increased by 32.2% in the annual rate. Of them, 25.6% were carried out in Canarias (with an increase of 21.7%).

On the other hand, the total number of overnight stays by international tourists in all types of accommodation (hotels, holiday dwellings, own homes, homes of relatives or friends, rented dwelling, etc.) reached 32.6 million, representing an increase of 23.3%.

Canarias was the Autonomous Community with the overnight stays (with more than 10.0 million, 12.3% more than in November 2021). It was followed by Andalucía (with nearly 5.5 million overnight stays and an increase of 11.0%) and Cataluña (with more than 5.1 million, 46.2% more).

### Stopovers and overnight stays by Autonomous Community of destination

### Review and update of data

The data published today is provisional and will be revised in March. These results are available at INEBase.

<sup>1</sup> A stopover refers to each overnight stay made during the trip. A trip may have as many stopovers as intermediate destinations where the traveller has stayed at least one night.

## Methodological note

The main objective of the Tourist Expenditure Survey (EGATUR) is to obtain monthly information on the tourist expenditure made by non-residents in Spain in their trips to our country.

For the preparation of EGATUR the international definitions and recommendations of the UNWTO and EUROSTAT in this field are followed.

**Type of operation:** continuous monthly statistics.

**Population scope:** this refers to non-residents in Spain who enter our country, whether or not they have stayed overnight, as well as those who pass through our country in transit.

**Geographical scope:** the entire national territory. The sample is collected at the main access points for non-resident travellers (road, airport, port and rail).

**Reference period of the results:** the month.

**Sample size:** The theoretical annual sample size of EGATUR exceeds 127,000 surveys, which are distributed throughout the year according to the seasonality of the flow of passengers and to the sample design, which is defined for each access road independently, setting a fraction of the sub-sampling from the FRONTUR sample.

**Type of sampling:** Single-stage, where the estimates of the FRONTUR survey are used as the target population to which the EGATUR data are elevated.

**Collection method:** personal interviews when the traveller leaves Spain.

A more complete tabulation plan with the main series of aggregates, as well as the microdata file for the reference month, is available on the INE website.

For more information you can access the methodology at:

[http://www.ine.es/en/daco/daco42/frontur/frontur\\_egatur\\_metodologia\\_en.pdf](http://www.ine.es/en/daco/daco42/frontur/frontur_egatur_metodologia_en.pdf)

And the standardised methodological report at:

<http://www.ine.es/dynt3/metadatos/en/RespuestaDatos.html?oe=16029>

Statistics from INE are prepared in accordance with the European Statistics Code of Practice, which is the basis of the Institution's quality policy and strategy. For more information, consult the section [Quality in the INE and Code of Practice](#) on the INE website.
