

29 May 2020

**Non-hotel Tourist Accommodation Occupancy Survey**  
April 2020. Provisional data

**There was no tourist activity in tourist accommodations during the month of April, as these establishments were closed to the general public due to the State of Alarm**

Order SND/257/2020, which entered into force on **March 19**, *declares the suspension of the normal operation of tourist accommodation establishments in accordance with article 10.6 of Royal Decree 463/2020, of March 14, which declares a “state of alarm” to manage the health crisis situation caused by COVID-1.* Its first section, it establishes the **suspension of the normal operation of all hotels** and tourist accommodations and other short-stay accommodations, campsites, RV parks and similar establishments, located anywhere in the national territory.

However, the third section establishes that this closure will take place at the moment in which the establishment no longer has any clientèle and, in any case, within a maximum period of seven calendar days from the entry into force of this rule.

As of March 19, tourist accommodations were thus progressively closed, and their activity for tourism purposes was suspended entirely on March 26.

## **Results**

As a consequence, **during the month of April, tourist apartments, camping sites, rural tourism accommodations and tourist hostels, located in the national territory, were closed for any type of tourist activity. The number of open establishments, bed-places offered, travellers received and overnight stays were thus zero throughout the national territory.**

It should be noted, however, that Order TMA/227/2020 gave some tourist accommodations the designation of essential services<sup>1</sup>. **These will remain closed to the general public** but must provide accommodation to workers carrying out certain types of activities (maintenance, health care, repair of general interest public works, agricultural and fishing product supply and housing of fishing vessel crews, as well as services complementary to these activities). Some establishments thus remained open for all or part of the month of April.

---

<sup>1</sup> The list of accommodations considered essential services was modified by Order TMA/305/2020 of March 30

According to European regulations, these establishments are not carrying out tourist activities, meaning their flows should not form part of the Non-hotel Tourist Occupancy Surveys.

### **Price indices**

Likewise, given that no tourist transactions took place in the establishments, and following Eurostat recommendations regarding price indices and index methodology, **there was no change in the prices of the services offered, and the variation rate was zero as compared to April 2019.**

These results have been uploaded to the INE website (INEbase) in order to continue with the series of variables for these statistical operations.

### **Revision and updating of data**

Coinciding with today's publication, the INE has updated the data for April 2019 of the Occupancy Survey in: Holiday Dwellings (HDOS), Campsites (COS), Rural Tourism Accommodation (RTAOS) and Hostels (HOS). As well as the Holiday Dwelling Price Index (HDPI), the Tourist Campsite Price Index (TCPI) and the Rural Tourism Accommodation Price Index (RTAPI).

## Methodological note

The main objective of the Holiday Dwelling Occupancy Survey (HDOS) is to ascertain the behaviour of a series of variables that make it possible to describe the segment that occupies this type of accommodation within the tourist sector, both from the point of view of supply and demand.

The Holiday Dwelling Price Index (HDPI) is a statistical measure of the monthly evolution of the prices offered by holiday dwelling establishments to their clients.

**Type of operation:** on-going monthly survey.

**Population scope:** holiday apartment establishments and/or companies operating holiday apartments.

**Geographical scope:** the entire national territory, with the exception of Ceuta and Melilla, where there are no establishments of this type.

**Reference period for the results:** monthly.

**Reference period for the information:** The consultation of basic data refers to a fortnight of the month, chosen randomly, in such way that the complete month is covered among all establishments.

**Type of sampling:** stratified sampling by province and establishment size, and stratified at island-size level for Canarias and Illes Balears.

**Collection method:** questionnaire filled in directly by the establishment.

For more information on these statistical operations, you can consult the [methodology and the standardised methodological report](#) for each of them in INEbase.

The main objective of the Campsite Occupancy Survey (COS) is to ascertain the behaviour of a series of variables that make it possible to describe the segment that this type of accommodation occupies within the tourist sector, from the viewpoint of both supply and demand.

The Tourist Campsite Price Index (TCPI) is a statistical measure of the monthly evolution of the prices offered by campsites to their clients.

**Type of operation:** on-going monthly survey.

**Population scope:** camping establishments.

**Geographical scope:** the entire national territory, with the exception of Ceuta and Melilla, where there are no establishments of this type.

**Reference period for the results:** monthly.

**Reference period of the information:** seven consecutive days of each month, chosen randomly in such way that all the establishments cover the whole month.

**Sample size:** approximately 1200 establishments.

**Type of sampling:** comprehensive survey in all provinces.

**Collection method:** questionnaire filled in directly by the establishment.

For more information on these statistical operations, you can consult the [methodology and the standardised methodological report](#) for each of them in INEbase.

The main objective of the Rural Tourism Accommodation Occupancy Survey (RTAOS) is to ascertain the behaviour of a series of variables that make it possible to describe the fundamental characteristics of this type of accommodation within the tourist sector, both from the point of view of supply and demand.

The Rural Tourism Accommodation Price Index (RTAPI) is a statistical measure of the monthly evolution of the prices that entrepreneurs of this type of accommodation apply to their clients.

**Type of operation:** on-going monthly survey.

**Population scope:** rural tourism establishments registered as such in the corresponding register of each Autonomous Community.

**Geographical scope:** the entire national territory, with the exception of Ceuta and Melilla where there are no establishments of this type.

**Reference period for the results:** monthly.

**Reference period for the information:** The consultation of basic data refers to all the days of the month.

**Type of sampling:** comprehensive survey in all provinces except those where the population size is large enough to take a sample.

**Collection method:** questionnaire filled in directly by the establishment.

For more information on these statistical operations, you can consult the [methodology and the standardised methodological report](#) for each of them in INEbase.

The main objective of the Hostels Occupancy Survey (HOS) is to ascertain the behaviour of a series of variables that make it possible to describe the fundamental characteristics of this type of accommodation within the tourist sector, both from the point of view of supply and demand.

For more information on this statistical operation, you can consult the [methodology and the standardised methodological report](#) in INEbase.
