¹ Information provided about the total number of travellers and overnight stays in the whole month.

² Due to the updating in the directory of establishments carried out in the province of Cuenca, the data to be published from January 2007 (for Cuenca, Castilla la Mancha and the national total) are not directly comparable with the data published last year, therefore, data link coefficients have been calculated to allow the comparison of data between different years. These coefficients are available in the information service of INE. (www.ine.es/infoine, tfno: 91 583 91 00).

⁴ To facilitate the comparability between data from different Autonomous Communities (and because of the different regulation and different characteristics), a group called rural house has been created, with those accommodations with similar typology (location, capacity, etc...). The variables included in the previous table have been estimated with that type of establishments.

The variables shown in the table have been estimated with the type of accommodation under rural tourist accommodation.

⁵ The size of the sample in these communities does not facilitate the INE the broken down results, with the objective of maintaining statistical secrecy. Nevertheless, the data corresponding to these communities are included in the total.
