* Due to the updating of the rural tourism accommodation directory of Canarias, the data published as of June 2009 (for Canarias and the national total) is not directly comparable with the data published last year. In order to avoid this break in the series, linking coefficients have been calculated, allowing for comparing the data from different years. The coefficients are published every month on the INE website, in the area dedicated to this statistical operation, in a specific section denominated "linking coefficients".

¹ Information provided about the total number of travellers and overnight stays in the whole month.

² Due to the updating in the directory of establishments carried out in the Canary Islands, the data to be published from June 2009 (for Las Palmas, Tenerife, Canary Islands and the national total) are not directly comparable with the data published last year, therefore, data link coefficients have been calculated to allow the comparison of data between different years. These coefficients are available in INE website (www.ine.es)

³ To facilitate the comparability between data from different Autonomous Communities (and because of the different regulation and different characteristics), a group called rural house has been created, with those accommodations with similar typology (location, capacity, etc...).

The variables included in the previous table have been estimated with that type of establishments.

The variables shown in the table have been estimated with the type of accommodation under rural tourist accommodation.
