* Due to the update made in the directory of hotel establishments in Canarias, the data published as of June 2009 (for Canarias and the national total) is not directly comparable with that published the previous year. In order to avoid this break in the series, linking coefficients have been created to allow users to compare data from different years. The coefficients are published each month on the INE website, in the section dedicated to this statistical operation, in a specific section entitled linking coefficients.

Overnight stays of German and British citizens decrease

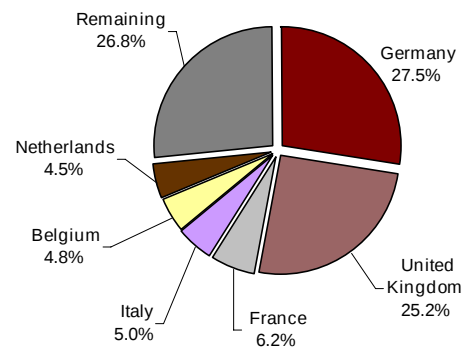

Guests from Germany and the United Kingdom made 10.2 million overnight stays in July, accounting for 52.7% of the total for non-residents. The German market experienced a 9.5% interannual decrease in its overnight stays, whereas the British market experienced an 11.5% decrease.

Methodological note 2009

Hotel Price Index - Hotel Income Index Base change to 2008

Since the year 2000, the INE has been publishing the Hotel Price Index (HPI) and the Hotel Income Index (HII), compiled with the information that hotel businesspersons include in a specific section of the Hotel Occupancy Survey questionnaire.

The changes occurring in the sector in recent years encouraged the introduction of certain modifications in said section of the questionnaire, from January 2008 onwards. With these changes, we hope, on the one hand, **to collect the new distribution channels favoured by generalised Internet use**, and on the other hand, **to adapt the questionnaire to the terms and concepts that are most frequently used within the sector**, as well as to the data available in the business management systems themselves.

In order to introduce all of the new information collected in the new questionnaire model in the computation of these indicators in a precise way, it is necessary to carry out a base change. For this reason, starting from January 2009, the Hotel Price Index and the Hotel Income Index shall be published in base 2008.

A base change in an indicator implies a break in the historical series, preventing, in this case, the comparison, as of January 2009, with the indices from previous periods. **So as to avoid this break, and maintain temporal comparability, the series published until December 2008 have been linked.**

Available on the INE website, http://www.ine.es/en/welcome_en.htm, are the HPI and HII series in base 2008, since January 2001 and January 2003, respectively, as well as the old series in base 2001 until December 2008.
